Lithium South Completes Alba Sabrina Claim Block Drilling. Deep Hole Underway at Natalia Maria Claim Block

23.03.2023 | CNW

VANCOUVER, March 23, 2023 - Lithium South Development Corp. (the "Company") (TSX-V: LIS) (OTCQB: LISMF) (F
OGPQ). Lithium South Development is pleased to announce the completion of AS07, the seventh exploration hole at th
Sabrina claim block, where the company has made a significant lithium discovery. With a depth of 152 meters, AS07 co
presence of brine. One double packer sample has been forwarded to Alex Stewart Laboratories of Mendoza, Argentina
Certified) for evaluation. Drilling is now underway at the Natalia Maria claim block, with a current drill depth of 375 mete

Drilling to date has delineated a brine-containing sub-basin approximately 1.2 kilometers wide by 7.6 kilometers in leng
extending northward from the main basin of Hombre Muerto Salar. The drill plan included a line of four core holes north
along the axis of the sub-basin, and three control holes along the west side of the sub-basin. The purpose of the contro
to define the west side of the sub-basin and to determine if the western boundary was affected by freshwater inputs. Al
Alba Sabrina have encountered significant thicknesses of brine.

Following the completion of the last borehole on the Alba Sabrina claim, the drill rig moved east to the Natalia Maria pro
drilling is underway at exploration hole NM01. Drilling at NM01 has intersected brine-bearing interbedded sediments an
halite from surface to the current depth of 375 meters. Nine packer samples have been collected between 24 and 189 m
a density range of 1.215 to 1.218 g/mL and a conductivity range of 196.3 to 209.5 mS/cm. Samples will be sent to Alex
Laboratories for analysis, drilling and sampling continue.

When the Natalia Maria borehole is complete, an updated resource estimate will be prepared by Groundwater Insight o
Canada.

"The successful drilling program at Alba Sabrina and the ongoing progress at Natalia Maria demonstrate our team's abi
identify highly prospective areas for lithium brine exploration and our commitment to delivering long-term shareholder v
Mr. Fernando Villarroel, COO of Lithium South Development. "We are excited to move forward with the updated resour
estimation and continue to explore and develop the Hombre Muerto North Lithium Project."

About Lithium South

Lithium South is focused on developing the Hombre Muerto North Lithium Project (HMN Li Project), located on the Hom
Salar, a major lithium-producing salar in Argentina. The property is adjacent to a US $4 billion lithium project developm
Korean multinational corporation POSCO, which acquired the ground from Galaxy Resources Ltd. for US $280 million.
Company completed a Preliminary Economic Assessment of the HMN Li Project in 2019, utilizing conventional evapora
extraction.
