## Drill Results Include 5.80 Metres Grading 9.37 g/t Gold and 64.8 g/t Silver and 2.95 Metres Grading 4.23 g/t Gold and 449.8 g/t Silver

VANCOUVER, BRITISH COLUMBIA -- ([Marketwire](#) - Dec. 6, 2011) - Douglas Forster, Chairman of [Calibre Mining Corp.](#) (TSX VENTURE: CXB) (the "Company" or "Calibre") is pleased to announce results from the Phase II resource delineation drilling program on the Company's 100%-owned Riscos de Oro epithermal gold-silver project in the Borosi Concessions of Northeast Nicaragua.

To date, 17 drill holes (4,336.9 metres) of a planned 6,000 metre program have been completed with assay results received for 9 holes totaling 2,328.4 metres. All 9 holes intersected veins or mineralized structures with variable gold and silver grades with results including: 5.80 metres grading 9.37 g/t gold and 64.8 g/t Ag (RD11-019) and 2.95 metres grading 4.23 g/t gold and 449.8 g/t Ag (RD11-025). The six most significant intercepts are highlighted in the table below.

Highlights of the Phase II Resource Delineation drill results include;

Douglas Forster, Chairman of Calibre stated: "In the Phase II Riscos de Oro drill program Calibre has been successful in confirming the continuity of the gold-silver vein system in a 200 metre long data gap between the areas of historic drill testing and the area newly identified by Calibre in the 2010 drill program. This resource delineation drill program also successfully added an additional 250 metres of confirmed strike length to the vein system northeast and southwest of the previously drilled areas, with gold-silver mineralization now confirmed over a strike length of 725 metres and to a depth of 299 metres."

The Phase II resource delineation drill program on the Riscos de Oro deposit is on-going. As detailed in a previous Calibre news release dated August 24, 2011, the drilling program is designed to further delineate high grade epithermal gold-silver vein stockwork mineralization encountered in previous drilling including 7.69 g/t Au and 211.80 g/t Ag over 10.6 metres in RD11-012 and 10.25 g/t Au and 288.25 g/t Ag over 5.4 metres in RD11-010.
