

Pardo JV Operator Provides Clarifying Disclosure on Eastern Reef and 007 Zone

19.12.2013 | [FSCwire](#)

Vancouver, British Columbia CANADA, December 19, 2013 /FSC/ - [Endurance Gold Corp.](#) (EDG - TSX Venture), ("Endurance"), announces that the operator of the Pardo Joint Venture property ("Pardo JV Property") has provided Endurance the following clarification regarding previously disclosed results of channel sampling from the Eastern Reef and 007 Zone discovery areas. This clarification pertains to press releases issued by Endurance on August 15th and 29th, 2013 and on September 6th and 24th, 2013. The Pardo JV Property is comprised of 16 claims covering approximately 33 square kilometres and is located 65 kilometres northeast of Sudbury, Ontario.

The Operator's disclosure and Endurance's subsequent identical disclosure of the length weighted average grades of several channel samples included language cautioning that the lengths reported did not represent true thicknesses of gold bearing units. The September 6, 2013 release indicated that the true thickness at the Eastern Reef was estimated at between 3 and 6 meters, while the true thickness at the 007 Zone was estimated at 2 meters. The Operator wishes to further clarify that the channel samples are contiguous over the surface. Due to the near flat lying nature of the sedimentary strata, it is not possible to cut samples across the gold-bearing strata. Samples are collected either parallel or perpendicular to the interpreted paleochannel direction. The channel lengths reported in the releases represent the gold distribution over the surface area sampled and do not represent true thicknesses of the mineralized unit.

Endurance currently holds a minority joint venture interest in the Pardo JV Property. The operator of the Pardo JV Property program is [Ginguro Exploration Inc.](#) ("GEG").

About Endurance

[Endurance Gold Corp.](#) is a company focused on the acquisition, exploration and development of highly prospective North American mineral properties with the potential to develop world-class deposits. The Company's exploration focus, for projects operated by Endurance, is intrusive-related mineral systems with potential for discovery of major new precious or rare metals deposits, and its business plan offers shareholders exposure to several majority-owned exploration projects with significant discovery potential such as the Bandito Rare Earth-Niobium Property in the Yukon, the Elephant Gold Property in Alaska, and the Rattlesnake Hills Gold Property in Wyoming.
