

Goldstar Minerals Completes Drilling at its Julien Property in Northern Quebec

25.02.2014 | [Marketwired](#)

MONTREAL, Feb 25, 2014 -[Goldstar Minerals Inc.](#) (TSX VENTURE:GDM) (the "Company" or "Goldstar Minerals") is pleased to announce that Forages Chibougamau has completed eight (8) holes totaling 1,337 m of diamond drilling on the Company's Julien polymetallic property, located 100 km East of Mattagami. The current drilling program tested several high-priority conductors that were identified by a previous airborne survey and further defined by a detailed ground IP survey. These targets appear to be associated with the Opatica - Abitibi suture zone.

A total of 306 samples, including standards and blanks, were shipped for preparation to the Table Jamésienne de Concertation Minière (TJCM) of Chibougamau, Québec. Pulps will be sent to ALS Minerals for multi-element assays, including gold, copper and tungsten. The Company expects to receive all results in the week starting March 10, 2014.

The Julien Property comprises 9,100 hectares (91 km²) and is located east of Mattagami, Québec. Access is good all year long with the presence of numerous logging roads that transect the property. The Company has an undivided 100% interest in these claims.

The Company also announces that Mark Trevisiol has resigned from the Board of Directors of Goldstar. Benoit Moreau, Goldstar Minerals' President and Chief Executive Officer thanked Mark for his contribution to the Company

Qualified Person
