

Scorpio Mining Reports First Quarter 2014 Production Results

15.04.2014 | [CNW](#)

TORONTO, April 15, 2014 /CNW/ - [Scorpio Mining Corp.](#) (TSX: SPM) ("Scorpio Mining" or the "Company") reports that production from the Nuestra Señora Operations totalled 556,911 silver equivalent ounces in the first quarter ended March 31, 2014 ("Q1").

Q1 2014 silver production was higher than Q4 2013; while silver equivalent production was lower because of a decline in lead, copper and zinc production in Q1 2014, compared to Q4 2013.

Q1 2014 experienced the highest quarterly plant throughput recorded by the Company since the plant start-up in 2008, at 137,317 tonnes. Silver recovery increased from 80.5% in Q4 2013 to 83.4% in Q1 2014, coinciding with the increase in silver head grades, from 75 g/t in Q4 2013, to 81 g/t in Q1 2014. Despite the lower head grades registered for copper, lead and zinc in Q1 2014, vs. the respective figures in Q4 2013, all the associated recoveries for these metals were higher for the quarter recently completed.

About Us

Scorpio Mining Corp. is a silver producer operating in Mexico with significant base metal by-product credits. The 100% owned Nuestra Señora Mine in the Cosalá District of Sinaloa State, Mexico, has flexible mining methods and diversified metal production. It has a fully mechanized underground operation and a 1,600 tonnes per day processing facility with permitted capacity for expansion to 4,000 tonnes per day. The plant produces zinc, copper and lead concentrates, with a significant payable silver component in the copper and lead concentrates.

In addition, the Company has numerous exploration targets in the vicinity of its current operations as well as

the advanced El Cajón and San Rafael development projects. The Company's strategy for near-term growth is currently focused on mine development of the El Cajón deposit upon receipt of permitting.
