

# Aker Solutions Wins Five-Year Contract From Statoil for Mariner Project

27.06.2014 | [Globenewswire Europe](#)

June 27, 2014 - Aker Solutions secured a contract from Statoil to provide maintenance and modifications services for the Mariner oilfield development in the UK North Sea.

The five-year framework agreement also has extension options for a total of four years. Aker Solutions' Aberdeen operations will manage the contract work.

"Mariner is the largest new offshore development in the UK in more than a decade and will lead to substantial job creation in the Aberdeen region," said David Currie, regional president for Aker Solutions in the UK. "We are delighted to take part in this important development and to build on our strong partnership with Statoil."

Aker Solutions will deliver the maintenance planning system in the pre-operations phase of the development, as well as support services during the hook-up and commissioning phase. The contract includes maintenance and modifications services after the field is set to start production in 2017.

"We want to build long-term, high-performance relationships with our key suppliers," said Gunnar Breivik, managing director of Statoil Production (U.K.) Limited in Aberdeen. "We know Aker Solutions well from the Norwegian continental shelf and are looking forward to working closely with its UK organization in the years to come."

The Mariner heavy oil field, discovered in 1981, is located on the East Shetland platform of the UK North Sea about 150 kilometers east of the Shetland Isles.

Both parties agreed not to disclose the contract value.
