

# West Point Resources Inc. Launches Cannabix Marijuana Breathalyzer Development

14.07.2014 | [Marketwired](#)

VANCOUVER, July 14, 2014 - [West Point Resources Inc.](#) (CSE:BLO) (the "Company") is pleased to announce that it has selected a prototype development firm based in British Columbia to complete the initial version of the Cannabix Marijuana Breathalyzer. KLN Klein Product Development of Vancouver, B.C. has been contracted to develop the prototype working closely with West Point's engineering team led by Dr. Raj Attariwala.

Dr. Attariwala stated, "I am excited to have the funding in place and to move forward on developing this much needed product for the law enforcement market. We have identified the major components for the marijuana breathalyzer collection device and are moving quickly to develop our prototype".

Kal Mahli, President of West Point stated, "We are fast tracking the development of the marijuana breathalyzer and have expedited the development process. We have chosen a prototype manufacturer that is capable of moving quickly with development and has vast experience with similar technologies. We have received significant interest for our device and we will be updating shareholders during the process."

West Point is the developer of the patent pending Cannabix Marijuana Breathalyzer for law enforcement. The Cannabix Marijuana Breathalyzer drug-impairment recognition system is based on breath testing technology that has been developed in Sweden and has been clinically researched to be successful in testing individuals for recent consumption of the THC component of marijuana. West Point is advancing its products to enable law enforcement personnel to use this technology to enhance detection of marijuana impaired driving offences on North American roads at a time when marijuana is becoming legal in many jurisdictions. The West Point drug-testing device will detect Tetrahydrocannabinol (THC- the psychoactive component of marijuana that causes intoxication) using breath samples. The device will provide rapid detection of THC and can be used roadside to identify drivers intoxicated by the use of marijuana. The device can also be useful for other practical applications such as testing employees in the workplace where intoxication by THC can be hazardous.

We seek Safe Harbor.

On behalf of the Board of Directors

"Rav Mlait", CEO  
West Point Resources Inc.

## **Cautionary Statement Regarding Forward-Looking Statements**

*This release and other documents filed by the Company contain forward-looking statements. All statements that are not clearly historical in nature or that necessarily depend on future events are forward-looking, and the words "will", "intend", "anticipate", "believe", "expect", "estimate", "plan" and similar expressions are generally intended to identify forward-looking statements. These forward-looking statements include, without limitation, performance and achievements of the Company, business and financing plans, business trends and future operating revenues. These statements are inherently uncertain and actual achievements of the Company or other future events or conditions may differ materially from those reflected in the forward-looking statements due to a variety of risks, uncertainties and other factors, including, without limitation, financial related risks, failure to obtain any required approvals of the regulatory authorities or from shareholders, failure to obtain any required financing, increased competition from other companies many of which have greater financial resources, dependence on key personnel and environmental risks and the other risks described in the Company's continuous disclosure documents.*
