Vancouver, BC / TheNewswire / March 12, 2015 - [Dajin Resources Corp.](#) ("Dajin") (TSX-V: DJI) (OTC: DJIFF) wishes to report that Management met with the National Mining Secretary for Argentina, Mr. Jorge Mayoral and other local mining authorities at the recent PDAC Mining conference held in Toronto. At the meeting, a plan was organized to advance the exploration and development of the Dajin holdings in the Salinas Grandes salar located in the Province of Jujuy in north western Argentina. National and Provincial Government support for this plan was given during the meeting.

The project is a target for locating a significant lithium, borax and potash potential in one of the larger salar systems in Argentina. National and Provincial government representatives expressed an urgent interest in seeing the exploration and development of the project by Dajin. Management is consulting with its advisory team in the prioritization of the holdings, some of which were under the control of the Argentine subsidiary of US Borax, Boratos Argentinos S.A. The combination of the three main product groups opens up the possibility of co-production of three different product lines all of which could supply distinct national and international markets.
