

Vancouver, BC / TheNewswire / June 15 2015 - [Cardiff Energy Corp.](#) (the "Company") (TSX-V: "CRS", Frankfurt: "C2Z.F", US Pinksheets: "CRRDF") announces the drill rig for the Clayton # 1H Horizontal Well in Runnels County, Texas has arrived. The location pits are complete and surface casing is set. The Company expects drilling to commence within 24 hours.

The Clayton # 1H will target the Gardner Lime. The Gardner Lime is a fractured limestone which is approximately 15 feet thick and comparable geologically to another major field in Texas called the Austin Chalk. The Austin Chalk has had a number of successful horizontal wells, of which some of the more prolific wells have had initial production of 1500 barrels of oil per day (BL/day). The Clayton # 1H will be drilled to a depth of approximately 4100 feet with a horizontal leg of up to 3500 feet. A frac is not required as the oil will flow through the limestone fractures. This will allow the Company to avoid the expensive frac process to release oil from the ground; with the potential for oil production being attained at a lower cost than average producers.

The Clayton # 1H is a joint venture between the Company, (who will take 2/3) and Martin Energies, the Operator, (who will take 1/3). The Clayton # 1H will be drilled adjacent to the Bearcat #4. Martin Energies, the Operator states, ""Due to the slowdown of drilling the deeper horizontal wells in the Midland area, some of the top experts in horizontal drilling are a part of the team."

Additionally, the Company is pleased to announce all 7,000,000 Units of the private placement announced on June 2, 2015 have been subscribed and will be submitted to the TSX for approval shortly. Each Unit consists of one common share at \$0.15 and one transferable share purchase warrant. The warrant will be exercisable for one additional common share at \$0.20 per share during the first year and \$0.30 per share during the second year. The proceeds derived from the total 7,000,000 Unit private placement will be used for drilling and completion of the Clayton #1 H and general working capital purposes.
