

CARSON CITY, Nev., July 13, 2015 (GLOBE NEWSWIRE) -- [Mexus Gold US](#) (OTCQB:MXSG) ("Mexus" or the "Company") announced today that after months of negotiating with several mining companies an agreement has been reached. President Paul Thompson is proud to announce that Mexus has signed an option/joint venture agreement with Minera Real del Oro S.A. de C.V., a Mexican corporation, which is wholly owned by [Argonaut Gold Inc.](#) (TSE:AR). Argonaut has the knowledge and experience along with the necessary capital to plan, drill, and bring the Julio/Martha Elena project into production. Mexus believes that Argonaut is the best fit for this project. Mr. Thompson added, "For approximately three years, Mexus performed geology, mapping, and exploration work on the property along with limited drilling. Within the property there are extensive vein systems and evidence for several large flat-lying shear zones believed to be related to thrust faulting. Work by Mexus have confirmed that both the veins and shears host multi-gram per tonne gold and silver values. Mexus has drill results which show a high grade, multi vein system throughout the property. Multiple target areas have been identified on the property and Argonaut is currently conducting geologic mapping and sampling in anticipation of an aggressive drill program over the next several months. Adequate work was completed for Mexus to realize that this project was too big for us and needed an experienced mining company such as Argonaut Gold. We are excited about the partnership and look forward to seeing Argonaut drill and ultimately bring this property to production."

#### About Mexus Gold US

[Mexus Gold US](#) is an American-based exploration company with holdings in Mexico. Mexus' 100% owned Julio/Martha Elena property is located 54km NW of Caborca, Mexico. This property lies within the heart of the Mojave-Sonora Megashear mineral belt of northern Mexico which is currently being mined by some of the largest mining companies in the world. Mexus also owns the rights to the Ocho Hermanos property, which is located 80km NE of Hermosillo, Mexico. Preliminary drilling on this property has been extremely promising. Founded in 2009, [Mexus Gold US](#) is committed to protecting the environment, mine safety and employing members of the communities in which it operates.
