

Toronto, Ontario (FSCwire) - [Stans Energy Corp.](#) (TSX-V: HRE, OTCQX: HREEF), (“Stans” or the “Company”) is pleased to announce that its Russian subsidiary Didym Inc. (“Didym””), a Skolkovo Foundation resident company, has been formally approved to apply for a grant from the Skolkovo Foundation. Through the Skolkovo Foundation, Didym, is now able to apply for government grants of up to 100 million RUB (~US\$1.44 million) for developing technologies for the separation of rare earths and other rare metals from mining production concentrates.

These research grants will be used by the Company to develop intellectual property for metals processing technologies, which will be used for individual rare earth and rare metal separation. Didym is currently preparing the grant application and hopes to have a completed application submitted to the Skolkovo Nuclear Technologies cluster for review within the next 90 days.

“Being a research and development center for rare earth and rare metals separation processing technologies, Didym will assist the Company’s future technical development programs. Furthermore Didym will be able to attract customers from around the world looking to develop new and innovative separation technologies for their own respective projects. We look forward to diversifying into this business vertical and capitalizing on the intellectual know-how we have been assembling over the years,” states Rodney Irwin, President and CEO.

About Skolkovo

The Skolkovo Foundation’s goal is to turn cutting-edge research into commercially-viable products of global relevance by creating a unique global hub for innovation and an ecosystem of entrepreneurs and talent. With a \$3.9 billion budget, over 1,000 companies and start- ups, three Nobel Laureates and hosting world-renowned scientists, the Skolkovo Innovation Center is Russia’s largest supporter of innovation and a new global technology hub. Over 1,000 companies focused on innovation have joined these clusters after having been rigorously screened through a competitive process calling upon an international panel of business and science review experts. More than 200 companies have already benefitted from research grants ranging between \$50,000 and \$10 million, to the tune of \$300 million to date.

About Stans Energy

[Stans Energy Corp.](#) is a resource development company focused on advancing rare earth and specialty metals properties focusing on areas of Central Asia and Russia. Stans acquired, among other things, the right to mine the past producing rare earth mine, Kutessay II, in the Kyrgyz Republic in 2009 and the right to mine Beryllium at Kalesay. Steps subsequently taken by the Government of the Kyrgyz Republic wrongfully to deprive the Company of those mining rights have required Stans to take the actions in legal tribunals and courts globally to protect the Company’s rights and recover damages caused by the Republic’s wrongful actions.

We seek safe harbour.
