

MONTREAL, QUEBEC--(Marketwired - Feb. 22, 2016) - [Beaufield Resources Inc.](#) ("Beaufield") (TSX VENTURE:BFD) is pleased to announce that it is increasing its Urban drilling program by 4,000 metres on its 100% owned Urban property which covers 12,357 hectares (123.57 km²) in central Quebec. This will be in addition to drilling adjacent to Urbana Corporation on the Macho Property (see December 18, 2016 news release).

On the southern portion of the Rouleau block, Beaufield has interpreted geophysics along the entire boundary surrounding the neighboring property where 3 magnetic trends are discernible. The geophysical data indicates that these trends extend on to Beaufield's ground beyond the north, south and east boundaries.

The planned drilling will focus on this area to evaluate the potential of the structure being mineralized on the Beaufield side.

Please refer to Beaufield's website for relevant maps or please contact Beaufield directly.

Beaufield will be attending the Prospectors and Developers Conference (PDAC) in Toronto from March 6th to March 9th, 2016. We welcome visitors to come meet management at booth #2903.
