

Vancouver, BC / TheNewswire / July 14, 2016 - Dajin Resources Corp. ("Dajin") (TSX-V: DJI) (OTC: DJIFF) (Frankfurt: A1XF20) is pleased to announce that Dr. Fernando Munoz Carmona has joined Dajin's Technical Advisory Board and has been retained to assist Dajin in moving its activities forward in Argentina with a focus on the Salinas Grandes salar.

Dr. Munoz, Colombian by birth, studied geology and seismology in Colombia and the USA while working for the Colombian Ministry of Energy and Mines at the Colombian Geological Survey (INGEOMINAS) Colombia. In 1995 he attended Arizona State University in Tempe, Arizona, USA where he completed a PhD in Human Communications. This degree led him to shift his focus from technical aspects of geology to community engagement and the articulation of social, governmental and company aspirations in the field of resource development. Since completing his PhD he has worked in all the Andean countries helping communities, companies and governments understand resource development and natural hazard mitigation. He joins Dajin as a Consultant and a member of the Technical Advisory Board.

Fernando's dual training and experience in geosciences and human communication has shaped his understanding of the relationship between humans and their geological surroundings. This knowledge has assisted him when bringing together and implementing projects for effective Earth's resource management, risk reduction and positive social transformation. Dr. Munoz comments "I am looking forward to working with Dajin in Jujuy, facilitating the articulation of shareholders and stakeholders', expectations, needs and resources around a Lithium development process that will have a positive socio-economic impact for the region and for the company."

About Dajin: (www.dajin.ca)

Dajin is an early stage energy metals exploration company holding a 100% interest in 294 placer claims known to contain Lithium and Boron values in the Teels Marsh region of Mineral County, Nevada. These claims, which cover 5,853 acres (2,369 hectares), are adjacent to the birth place of US Borax Corp's first borax mine. Dajin also holds 191 placer claims covering 3,851 acres (1,558 hectares) in the Alkali Lake region of Esmeralda County, Nevada. Dajin has entered into an option agreement with Nevada Energy Metals Inc. (TSX-V:BFF) to explore these claims located 7 miles (12 kilometers) northeast of Rockwood's Clayton Valley Lithium operations.

Dajin also holds a 100% interest in concessions or concession applications in Jujuy Province, Argentina that were acquired in regions known to contain brines with Potassium, Lithium and Boron values. These concessions total approximately 93,000 hectares (230,000 acres) and are located in the Salinas Grandes/Guayatayoc salt lakes basin adjacent to concessions held by [Orocobre Ltd.](#) (TSX-T:ORL), who is partnered with Toyota Tsusho. In July 2015, Dajin executed an agreement with the Tres Morros Cooperativa for exploration of the San Jose Project consisting of 4,400 hectares (10,873 acres) of mineral concessions (San Jose and Navidad) within the Salinas Grandes salar.
