TORONTO, ONTARIO--(Marketwired - Oct 4, 2016) -

All amounts expressed in US dollars

<u>Barrick Gold Corp.</u> (NYSE:ABX)(TSX:ABX) (Barrick or the "company") today announced the resumption of normal operations at the Veladero mine in Argentina following approval from San Juan provincial authorities.

Operations at the mine were suspended on September 15, a week after falling ice damaged a pipe carrying process solution in the leach pad area, causing some material to leave the leach pad. This material, primarily crushed ore saturated with process solution, was contained on the mine site and returned to the leach pad. Extensive water monitoring in the area has confirmed the incident did not result in any environmental impacts. The company has completed a series of remedial works required by provincial authorities designed to prevent such an incident from reoccurring, including increasing the height of the perimeter berms that surround the leach pad.

As normal operations resume, the company will continue to assess the impact of the temporary suspension on Veladero's production for 2016. However, Barrick continues to expect total gold production for 2016 in the range of 5.0-5.5 million ounces at a cost of sales applicable to gold of \$5.2-\$5.5 billion and all-in sustaining costs<sup>1</sup> of \$750-\$790 per ounce.<sup>2</sup>

## **ENDNOTES**

- 1. "Cash costs" per ounce and "All-in sustaining costs" per ounce are non-GAAP financial performance measures. "Cash costs" per ounce is based on cost of sales but excludes, among other items, the impact of depreciation. "All-in sustaining costs" per ounce begins with "Cash costs" per ounce and adds further costs which reflect the additional costs of operating a mine, primarily sustaining capital expenditures, general & administrative costs and minesite exploration and evaluation costs. Barrick believes that the use of "cash costs" per ounce and "all-in sustaining costs" per ounce will assist investors, analysts and other stakeholders in understanding the costs associated with producing gold, understanding the economics of gold mining, assessing our operating performance and also our ability to generate free cash flow from current operations and to generate free cash flow on an overall company basis. "Cash costs" per ounce and "All-in sustaining costs" per ounce are intended to provide additional information only and do not have any standardized meaning under IFRS. Although a standardized definition of all-in sustaining costs was published in 2013 by the World Gold Council (a market development organization for the gold industry comprised of and funded by 18 gold mining companies from around the world, including Barrick), it is not a regulatory organization, and other companies may calculate this measure differently. These measures should not be considered in isolation or as a substitute for measures prepared in accordance with IFRS. Further details on these non-GAAP measures are provided in the MD&A accompanying Barrick's financial statements filed from time to time on SEDAR at www.sedar.com and on EDGAR at www.sec.gov.
- 2. Guidance is based on gold, copper, and oil price assumptions of \$1,250/oz, \$2.10/lb, and \$50/bbl, respectively, a USD:AUD exchange rate of 0.73:1, a CAD:USD exchange rate of 1.30:1, and a CLP:USD exchange rate of 690:1.

## CAUTIONARY STATEMENT ON FORWARD-LOOKING INFORMATION

Certain information contained in this press release, including any information as to our strategy, projects, plans or future financial or operating performance, constitutes "forward-looking statements". All statements, other than statements of historical fact, are forward-looking statements. The words "will", "expect", "continue", "assess", "designed to prevent" and similar expressions identify forward-looking statements. In particular, this press release contains forward-looking statements including, without limitation, with respect to: (i) Barrick's forward-looking production guidance; (ii) estimates of future cost of sales for gold and all-in-sustaining costs per ounce; (iii) mine life and production rates; (iv) potential mineralization and metal or mineral recoveries; and (v) expectations regarding future price assumptions, financial performance and other outlook or guidance.

Forward-looking statements are necessarily based upon a number of estimates and assumptions; including material estimates and assumptions related to the factors set forth below that, while considered reasonable by the company as at the date of this press release in light of management's experience and perception of current conditions and expected developments, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements and undue reliance should not be placed on such statements and information. Such factors include, but are not limited to: fluctuations in the spot and forward price of gold, copper or certain other commodities (such as silver, diesel fuel, natural gas and electricity); failure to comply with environmental and health and safety laws and regulations; timing of receipt of, or failure to comply with, necessary permits and approvals; the speculative nature of mineral exploration and development; changes in mineral production performance, exploitation and exploration successes; diminishing quantities or grades of reserves; increased costs, delays, suspensions and technical challenges associated with the construction of capital projects; operating or technical difficulties in connection with mining or development activities, including geotechnical challenges and disruptions in the maintenance or provision of required infrastructure and information technology systems; the impact of global liquidity and credit availability on the timing of cash flows and the values of assets and liabilities based on projected future cash flows; the impact of inflation; fluctuations in the currency markets; changes in U.S. dollar interest rates; changes in national and local government legislation, taxation, controls or regulations and/or changes in the administration of laws, policies and practices, expropriation or

nationalization of property and political or economic developments in Argentina, Canada, the United States and other jurisdictions in which the company does or may carry on business in the future; lack of certainty with respect to foreign legal systems, corruption and other factors that are inconsistent with the rule of law; damage to the company's reputation due to the actual or perceived occurrence of any number of events, including negative publicity with respect to the company's handling of environmental matters or dealings with community groups, whether true or not; risk of loss due to acts of war, terrorism, sabotage and civil disturbances; litigation; contests over title to properties, particularly title to undeveloped properties, or over access to water, power and other required infrastructure;

risks associated with working with partners in jointly controlled assets; employee relations including loss of key employees; increased costs and physical risks, including extreme weather events and resource shortages, related to climate change; and availability and increased costs associated with mining inputs and labor. In addition, there are risks and hazards associated with the business of mineral exploration, development and mining, including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, flooding and gold bullion, copper cathode or gold or copper concentrate losses (and the risk of inadequate insurance, or inability to obtain insurance, to cover these risks).

Many of these uncertainties and contingencies can affect our actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, us. Readers are cautioned that forward-looking statements are not guarantees of future performance. All of the forward-looking statements made in this press release are qualified by these cautionary statements. Specific reference is made to the most recent Form 40-F/Annual Information Form on file with the SEC and Canadian provincial securities regulatory authorities for a more detailed discussion of some of the factors underlying forward-looking statements and the risks that may affect Barrick's ability to achieve the expectations set forth in the forward-looking statements contained in this press release.

The company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable law.
