

KELOWNA, BC, Oct. 7, 2016 /CNW/ - [Georox Resources Inc.](#) ("Georox" or the "Corporation") (GXR:TSX-V; OF6A:FRA) announces the issuance of incentive stock options to the Directors of the Corporation to acquire up to an aggregate of 1,000,000 common shares of the corporation at an exercise price of \$0.10 per share. All such options are exercisable for a period of five years and the shares are vested on a quarterly basis of not less than eighteen months from the date of grant.

Upon granting of the options described above, Georox will have 1,200,000 options outstanding which represents 5% of the issued and outstanding shares.

The Corporation currently produces approximately 140 boepd of which 75% is light oil, 24% is heavy oil and 1% is gas.

Production volumes are commonly expressed on a barrel of oil equivalent ("BOE") basis whereby natural gas volumes are converted at a ratio of six thousand cubic feet to one barrel of oil. The intention is to convert oil and natural gas measurement units into one basis for improved analysis of results and comparisons with other industry participants. The term BOE may be misleading, particularly if used in isolation. The conversion ratio is based on an energy equivalent method and does not represent an economic value equivalency at the wellhead.
