

# First Mining Finance Corp. Completes Fall Drill Program at Pickle Crow Project

03.02.2017 | [Marketwired](#)

## Intersects 1.28 g/t over 12.70 metres, including 15.14 g/t over 0.70 metres in the No. 15 Vein

VANCOUVER, Feb. 3, 2017 - [First Mining Finance Corp.](#) ("First Mining" or the "Company") (TSX VENTURE:FF) (OTCQX:FFMGF) (FRANKFURT:FMG) is pleased to announce the completion of an initial diamond drill program on its 100% owned Pickle Crow Project ("Pickle Crow"), located in northwestern Ontario, Canada.

### Highlights:

- Hole PC-16-306 intersected 1.28 g/t over 12.70 metres including 15.14 g/t over 0.70 metres in the middle vein zone of the No. 15 Vein.
- Visible gold was intersected in Hole PC-16-306 in the lower vein zone of the No. 15 Vein.

*Note: Reported widths are drilled core lengths; true widths are unknown at this time. All assays are performed by Accurassay Laboratories of Thunder Bay, Ontario. Assay values are uncut.*

A total of nine holes comprising approximately 1,300 metres were drilled during the fall 2016 program. The drill program targeted several shallow, high-grade vein and banded iron formation hosted targets in the core mine trend. The objective of this exploration program was to test extensions of known vein zones and discover new high-grade gold mineralization.

Gold mineralization was encountered in seven of the nine drill holes and visible gold was intercepted in the lower most vein zone of the No. 15 Vein structure. A 0.30 metre section of drill core from the lower vein zone which included the visible gold was not assayed as it was retained for display purposes, hence the reported intercept of 1.15 g/t gold over 8.19 metres excludes this interval and the 0.30 metre section was included at zero grade.

Commenting on the results, Patrick Donnelly, President of First Mining stated, "The recent drilling program at Pickle Crow demonstrates that there is widespread gold mineralization at the property. Given the success of this drilling program the Board of Directors has authorized a winter drilling campaign at Pickle Crow which is to be comprised of four additional holes totaling approximately 1,000 metres. We look forward to seeing how this second drilling campaign unfolds."

Table 1. Significant Intercepts.

Hole ID	Area	Description	From (m)	To (m)	Interval (m)	Au g/t
PC-16-302	Shaft 3 (No. 19 Vein up dip)	No Significant Assays				
PC-16-303	Shaft 3 (PC-103-083 Vein up dip)	No Significant Assays				
PC-16-304	Albany (PC-09-051 Vein)	Shear zone	106.5	107.0	0.5	1.57
PC-16-304		Zone, QFP	129.0	135.7	6.7	0.36

PC-16-305	Albany (PC-09-051 Vein)	Zone, Vein	53.3	53.8	0.5	1.62
PC-16-305		Zone, QFP & MV	125.6	149.4	23.8	0.53
PC-16-305		Including	137.1	140.1	3.0	2.53
PC-16-305		Zone, QFP	160.9	162.0	1.1	0.71
PC-16-306	No. 15 Vein	Upper No. 15 Vein	71.3	78.0	6.7	0.59

PC-16-306	Including	74.3	75.0	0.7	3.53
PC-16-306	Middle No. 15 Vein	82.0	94.7	12.7	1.28
PC-16-306	Including	83.2	84.4	1.3	1.20
PC-16-306	Including	88.8	89.5	0.7	15.14
PC-16-306	Including	92.0	93.0	1.0	1.72
PC-16-306	Lower No. 15 Vein	110.4	118.6	8.2	1.15
PC-16-306	Including	113.0	114.0	1.0	2.66
PC-16-306	Including	116.0	117.8	1.8	2.63
PC-16-307 Crowshore	Zone, BIF	34.7	37.2	2.5	0.34
PC-16-307	Shear zone	96.4	98.0	1.6	0.51
PC-16-307	Shear zone	101.9	103.3	1.4	0.70
PC-16-308 Crowshore	Zone, BIF	20.1	21.4	1.3	0.28
PC-16-309 No. 15 Vein	Upper No. 15 Vein	86.6	90.1	3.5	0.14
PC-16-309	Shear zone	106.1	108.6	2.5	0.58
PC-16-309	Shear zone	115.0	121.4	6.4	0.12
PC-16-310 Sawmill Vein	Zone, BIF	37.5	42.0	4.5	1.34
PC-16-310	Zone, BIF	49.0	52.5	3.5	0.34

*All assays are performed by Accurassay Laboratories of Thunder Bay, Ont. Samples were analyzed by using 50-gram fire assay with an atomic absorption finish. Samples greater than 10 grams per tonne or with visible gold were analyzed by 1,000-gram pulp metallic analysis with a gravimetric finish. All assays reported are uncut. Reported widths are drilled core lengths, and true widths are unknown at this time. Accurassay Laboratories is independent of First Mining and has no relationship with First Mining.*

#### QA/QC Procedures

First Mining implemented the following QA/QC procedures for the Pickle Crow Gold Project drill program.

NQ diameter (47.6 mm) drill core is logged then sawn in half onsite, with one half bagged and labelled and the other half placed in core boxes to serve as a permanent record and stored in a secure on-site facility. All samples are shipped from the site via Manitoulin Transport to the Accurassay Laboratories facility in Thunder Bay, Ontario, for crushing, pulverization and pulp preparation. Accurassay Laboratories is independent of First Mining and has no relationship with First Mining.

All samples sent for analyses are prepared using a jaw crusher, which is cleaned with compressed air between samples, resulting in 70% of the sample passing through a 10 mesh screen. A 1,000 gram split of the crushed sample is then pulverized with 85% passing through a 200 mesh screen. Fire assays are performed using 50 grams of sample with assays equal to or greater than 5 g/t calculated gravimetrically, and lower grade samples measured by atomic absorption (AA). All samples greater than 10 g/t are additionally sent for screen metallics analysis using the remainder of the pulp (~950 grams of sample).

Blanks, standards (one high-grade, one mid-grade, and one low-grade), field duplicates (1/4 split cores), and crush duplicates are inserted sequentially at least every 8<sup>th</sup> sample into the drill core samples before shipment. Standards consist of a high-grade (~13 g/t Au), a mid-grade (~5 g/t Au), and a low-grade (~1 g/t Au) gold standard from Geostats Pty. Ltd. of Fremantle, Western Australia, as well as blanks from Nelson Granite of Kenora, Ontario.

A more detailed description of the QA/QC procedures employed may be found in Section 14.2 (PC Gold Data Verification) of the NI 43-101 resource estimate for the Property entitled "A Mineral Resource Estimate for the Pickle Crow Property, Patricia Mining Division, Northwestern Ontario, Canada", dated June 2, 2011.

Dr. Chris Osterman, P.Geo., CEO of First Mining, is the "qualified person" for the purposes of National Instrument 43-101 *Standards of Disclosure for Mineral Projects* and he has reviewed and approved the scientific and technical disclosure contained in this news release.

## ABOUT THE PICKLE CROW PROJECT

The Pickle Crow Gold Project was a high-grade operating gold mine until the 1960s. First Mining acquired the project through its acquisition of [PC Gold Inc.](#) in November 2015. The project, which covers an area of over 14,700 hectares, is located in northwestern Ontario, approximately 400 kilometres north of Thunder Bay and approximately 11 kilometres east of the Township of Pickle Lake.

## ABOUT FIRST MINING FINANCE CORP.

First Mining is a mineral property holding company whose principal business activity is to acquire high quality mineral assets with a focus in the Americas. The Company currently holds a portfolio of 25 mineral assets in Canada, Mexico and the United States with a focus on gold. Ultimately, the goal is to continue to increase its portfolio of mineral assets through acquisitions that are expected to be comprised of gold, silver, copper, lead, zinc and nickel.

## Cautionary Note Regarding Forward-Looking Statements

*This news release includes certain "forward-looking information" and "forward-looking statements"(collectively "forward-looking statements") within the meaning of applicable Canadian and United States securities legislation including the United States Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included herein, without limitation, statements relating the future operating or financial performance of the Company, are forward-looking statements.*

*Forward-looking statements are frequently, but not always, identified by words such as "expects", "anticipates", "believes", "intends", "estimates", "potential", "possible", and similar expressions, or statements that events, conditions, or results "will", "may", "could", or "should" occur or be achieved. Forward-looking statements in this news release relate to, among other things: commencement of winter drilling at the Pickle Crow gold project, the expected number of holes and metres to be drilled and the success of such drilling; the discovery of high-grade, vein-type mineralization within the western extension of the Pickle Crow gold project, the extent of mineralization at the Pickle Crow gold project; and the exploration potential and upside of any of the Company's projects. There can be no assurance that such statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements. Forward-looking statements reflect the beliefs, opinions and projections on the date the statements are made and are based upon a number of assumptions and estimates that, while considered reasonable by the respective parties, are inherently subject to significant business, economic, competitive, political and social uncertainties and contingencies.*

*Many factors, both known and unknown, could cause actual results, performance or achievements to be materially different from the results, performance or achievements that are or may be expressed or implied by such forward- looking statements and the parties have made assumptions and estimates based on or related to many of these factors. Such factors include, without limitation, the results of future exploration efforts at the Pickle Crow project; management's discretion to refocus its exploration efforts; fluctuations in the spot and forward price of gold, silver, base metals or certain other commodities; fluctuations in the currency markets (such as the Canadian dollar versus the U.S. dollar); changes in national and local government, legislation, taxation, controls, regulations and political or economic developments; risks and hazards associated with the business of mineral exploration, development and mining (including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins and flooding); the presence of laws and regulations that may impose restrictions on mining; employee relations; relationships with and claims by local communities and indigenous populations; availability and increasing*

*costs associated with mining inputs and labour; the speculative nature of mineral exploration and development; and title to properties.. Readers should not place undue reliance on the forward-looking statements and information contained in this news release concerning these times. Except as required by law, First Mining does not assume any obligation to update the forward-looking statements of beliefs, opinions, projections, or other factors, should they change, except as required by law.*

*Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.*
