

TORONTO, ONTARIO--(Marketwired - May 29, 2017) - [Barrick Gold Corp.](#) (NYSE:ABX)(TSX:ABX) ("Barrick" or the "Company") reports that members of the AOMA union at the Veladero mine in San Juan province, Argentina, have ended a work stoppage that began on May 28. The Company has initiated a formal dialogue process with the union leadership to address issues of concern.

We continue to anticipate the resumption of normal leaching activities at Veladero in the second half of June, subject to approval by San Juan regulatory and judicial authorities. Leaching activities at Veladero have been restricted since March 29, after a pipe carrying processing solution at the mine's heap leach facility failed.

CAUTIONARY STATEMENT ON FORWARD-LOOKING INFORMATION

Certain information contained in this press release, including any information as to our strategy, projects, plans or future operating performance, constitutes "forward-looking statements". All statements, other than statements of historical fact, are forward-looking statements. The words "address", "continue", "anticipate" and similar expressions identify forward-looking statements. In particular, this press release contains forward-looking statements including, without limitation, with respect to Barrick's forward-looking operating guidance for its Veladero mine. Forward-looking statements are necessarily based upon a number of estimates and assumptions; including material estimates and assumptions related to the factors set forth below that, while considered reasonable by the Company as at the date of this press release in light of management's experience and perception of current conditions and expected developments, are inherently subject to significant business, economic and competitive uncertainties and contingencies.

Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements and undue reliance should not be placed on such statements and information. Such factors include, but are not limited to: employee relations including loss of key employees; failure to comply with environmental and health and safety laws and regulations; timing of receipt of, or failure to comply with, necessary permits and approvals; litigation; damage to the Company's reputation due to the actual or perceived occurrence of any number of events, including negative publicity with respect to the Company's handling of environmental matters or dealings with community groups, whether true or not; availability and increased costs associated with mining inputs and labor; changes in national and local government legislation, taxation, controls or regulations and/or changes in the administration of laws, policies and practices, expropriation or nationalization of property and political or economic developments in Argentina, Canada, the United States and other jurisdictions in which the Company does or may carry on business in the future; lack of certainty with respect to foreign legal systems, corruption and other factors that are inconsistent with the rule of law; risk of loss due to acts of war, terrorism, sabotage and civil disturbances; risks associated with working with partners in jointly controlled assets; the speculative nature of mineral exploration and development; changes in mineral production performance; increased costs, delays, suspensions and technical challenges associated with the construction of capital projects; operating or technical difficulties in connection with mining or development activities, including geotechnical challenges and disruptions in the maintenance or provision of required infrastructure and information technology systems; the impact of inflation; fluctuations in the currency markets; contests over title to properties, particularly title to undeveloped properties, or over access to water, power and other required infrastructure; and increased costs and physical risks, including extreme weather events and resource shortages, related to climate change. In addition, there are risks and hazards associated with the business of mineral exploration, development and mining, including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, flooding and gold bullion, copper cathode or gold or copper concentrate losses (and the risk of inadequate insurance, or inability to obtain insurance, to cover these risks).

Many of these uncertainties and contingencies can affect our actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, us. Readers are cautioned that forward-looking statements are not guarantees of future performance. All of the forward-looking statements made in this press release are qualified by these cautionary statements. Specific reference is made to the most recent Form 40-F/Annual Information Form on file with the SEC and Canadian provincial securities regulatory authorities for a more detailed discussion of some of the factors underlying forward-looking statements and the risks that may affect Barrick's ability to achieve the expectations set forth in the forward-looking statements contained in this press release.

The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable law.
