

Braveheart Resources Inc. Commences Diamond Drilling Program at its Alpine Mine Property near Nelson BC

29.08.2017 | [Newsfile](#)

Toronto, August 29, 2017 - [Braveheart Resources Inc.](#) (TSXV: BHT) ("Braveheart" or, the "Company") announces the commencement of its planned 2017 Drilling Program. This follows its success in recently completing the last tranche of a non-brokered private placement financing consisting of 125,000 flow-through units at \$0.06 per flow-through unit and 1,600,000 units at \$0.06 per unit for gross proceeds of \$103,500.

This results in an oversubscribed total financing raise of \$804,000 and will finance the 2017 drilling program and general working capital. All securities issued pursuant to the financing will be subject to a four month hold period.

Phil Keele, Braveheart President and CEO stated. "The objective of this drilling program is to improve our understanding of the gold potential on the down dip side of the vein structure at the Alpine Mine Property ("Alpine"). Alpine has a rich history of gold production primarily dating back to the 1930's and 40's. These workings still exist today. This drilling will improve our estimate of what additional gold resource potentially exists on this exciting, high grade property. Drilling core holes that intersect the vein structure and then analyzing the core in a qualified laboratory enables us to do just that. We are confident that our drilling contractor, Lucky Drilling Ltd, supported by the competent services of TerraLogic Exploration Inc. and Masse Environmental Consultants Ltd., will enable the completion of a series of strategically selected drill holes safely, efficiently, on budget and in an environmentally sensitive manner. I am grateful to all of our shareholders that believe, like I do, in the value of [Braveheart Resources Inc.](#) and the growth of its suite of BC gold properties."

Key Highlights:

● This fully funded drilling program will include mapping, geological sampling and surveys, laboratory work and conceptual mine planning that will extend through 2017.

● The program consists of approximately 1,500 meters of diamond drilling.

● The drilling permit is valid for 5 years.

● According to historical records, maintained by BC Ministry Energy and Mines, Alpine produced more than 16,000 tonnes of mineralized material generating more than 11,000 oz Au over its life.

● An extensive sampling program is being conducted on mineralized dumps located at Alpine. This will be compared to historical work performed by Cove Resources in 1989.

● A selective rock sampling program undertaken on mineralized dumps in 2011 at Braveheart's Black Prince, Gold Crown and King Solomon mines indicated that significant gold grades can occur.
