

# Milligan West Drill Program Identifies Target for Follow-up

20.12.2017 | [Marketwired](#)

VANCOUVER, BRITISH COLUMBIA--(Marketwired - Dec 20, 2017) - [Serengeti Resources Inc.](#) (TSX VENTURE:SIR)(FRANKFURT:34S) ("Serengeti" or "the Company") announces results for drilling completed on the joint venture Milligan West property (Serengeti: 56.3%, [Fjordland Exploration Inc.](#): 43.7%; see news release NR 2017-12, October 4, 2017) located 75 kilometres northwest of Fort St. James in north-central British Columbia, and four kilometres west of the current producing Mt. Milligan copper-gold mine.

Drilling at Milligan West in 2017 totalled 1,256 metres in three holes targeting zones identified by a 2016 Induced-Polarization (IP) survey, earlier property-wide geophysical surveys and two short drill holes completed by previous workers. Encouraging intersections were intersected within skarn and feldspar-porphyry dykes, including 1.12 g/t gold, 0.70 g/t silver and 0.14% copper over 1.5 metres in MW-17-02, with maximum gold and silver values reaching 1.57 g/t over 1.5 metres, and 33.50 g/t over 3.1 metres respectively.

The 2017 Milligan West program added significantly to the understanding of the local geology and has led to the identification of a new, untested near-surface geophysical target area approximately one kilometre to the north of the 2017 drill holes. The new geophysical target area is coincident with historical copper-, zinc- and gold-in-soil geochemical anomalies, which lie directly on trend with the Mt. Milligan - Heidi Lake sulphide system to the east. Although the nature of mineralized intercepts from the 2017 program is discontinuous, the program confirmed that mineralization at Milligan West is associated with hydrothermal intrusive activity. Serengeti remains optimistic in the potential for the property to host a significant mineralized system.

Moving forward, Serengeti plans to potentially expand the IP survey coverage and test the refined target area with shallow drill holes. To view more information on the Milligan West property, please visit the Company's website: <https://www.serengetiresources.com/projects/milligan-west/>

Notable intersections from the 2017 drilling program as well as associated geological observations are included in the table below:

HoleID	From (m)	To (m)	Interval (m)	Au (g/t)	Ag (g/t)	Cu (%)	Geological Context
MW-17-01	164.0	167.0	3.1	0.23	33.50	0.01	Sericite-carbonate-quartz altered feldspar-porphyry dyke
	295.0	301.1	6.1	0.35	0.25	0.01	Sericite-chlorite-carbonate-quartz altered argillite
	371.2	374.3	3.0	0.38	0.10	0.01	Sericite-chlorite-carbonate-quartz altered ash tuff
MW-17-02	160.0	192.0	32.0	0.10	0.37	0.01	Chlorite-sericite altered agglomerate
<i>including</i>	187.8	189.3	1.5	1.57	0.30	0.01	Quartz-sericite-chlorite altered feldspar porphyry dyke
	264.3	267.3	3.0	0.03	15.60	0.02	Sericite-chlorite-carbonate-quartz altered argillite
	300.0	302.0	2.0	1.12	0.70	0.14	Chlorite-epidote-carbonate skarn altered ash tuff
MW-17-03	No Significant Intercepts						

## Milligan West 2017 Drill Results

## About Serengeti Resources Inc.

Serengeti is a mineral exploration company managed by an experienced team of professionals with a solid track record of mineral exploration success. The Company is currently advancing its Kwanika copper-gold project in partnership with POSCO International Corporation and exploring its extensive portfolio of properties in the highly prospective Quesnel Trough of British Columbia. A number of these other projects are available for option or joint venture and additional information can be found on the Company's website at [www.serengetiresources.com](http://www.serengetiresources.com).

ON BEHALF OF THE BOARD

David W. Moore, P. Geo, President, CEO and Director

#### Quality Assurance/Quality Control

Sample analysis for the current program was completed at Activation Laboratories Ltd. in Kamloops, BC and Thunder Bay, Ontario. A quality assurance/quality control program including blanks and standards form part of the sampling protocol to the laboratory's own quality assurance program. The field program was supervised by [Serengeti Resources Inc.](#) staff. The technical information in this news release has been prepared in accordance with Canadian regulatory requirements as per National Instrument 43-101, and reviewed by the Company's qualified person, David W. Moore, P. Geo., President and CEO of [Serengeti Resources Inc.](#)

#### Cautionary Statement

This document contains "forward-looking statements" within the meaning of applicable Canadian securities regulations. Statements other than statements of historical fact herein, including, without limitation, statements regarding exploration, other future plans and objectives, are forward-looking statements that involve various risks and uncertainties. There can be no assurance that such statements will prove to be accurate and future events and actual results could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from our expectations are disclosed in the Company's documents filed from time to time via SEDAR. Forward-looking statements are based on the estimates and opinions of management on the date the statements are made, and we do not undertake any obligation to update forward-looking statements should conditions or our estimates change, other than as required by law and readers are further advised not to place undue reliance on forward-looking statements.
