Grenville Thomas, Director of Westhaven stated, "Gareth, the founder of Westhaven, has been instrumental in building the Company and its dominant land package on the Spences Bridge Gold Belt. His continued commitment to proving the gold potential of this newly discovered gold belt is imperative to the long-term success of the Company." Thomas adds, "We are very pleased to welcome Ms. McDonald to our Board. Her experience will add greatly to Westhaven's management depth."

The Spences Bridge Gold Belt (SBGB)

Westhaven owns a 100% interest in over 35,000 hectares within the prospective SBGB, which is situated within a geological setting similar to those which host other significant epithermal systems. It is close to existing transportation and infrastructure allowing for cost-effective exploration. The SBGB is a 110 kilometre northwest-trending belt of intermediate to felsic volcanic rocks dominated by the Cretaceous Spences Bridge group. Westhaven has been working on the SBGB since 2011 and believes these relatively underexplored volcanic rocks are highly prospective for epithermal style gold mineralization.
