SSRM continues to explore Taiga's Fisher property under option and currently has two drills on site to complete a Phase 1, 10,000m drill program. Approximately 8,000m have been drilled this year in 15 holes. Results will be reported as they are compiled and interpreted. A second, 8,000m program is planned to commence later this year following summer geological surface work, which is scheduled to commence immediately.
