

Tethyan Commences TDIP Survey and Additional Exploration at Kizevak

24.09.2018 | [Newsfile](#)

Jersey, September 24, 2018 - [Tethyan Resources Plc](#) (TSXV: TETH) ("Tethyan" or the "Company") is pleased to announce that it has contracted Terratec Geophysical Services GmbH ("Terratec") to conduct a Time Domain Induced Polarisation (TDIP) geophysical survey on the Kizevak zinc-lead-silver prospect, located within Tethyan's Kremice exploration licence in Southwest Serbia.

The TDIP survey has been designed to test a zinc-lead-silver \pm gold soil anomaly at the Kizevak Southeast and Kizevak South prospects, which includes the along strike and down dip extensions of mineralisation intercepted in drilling as announced by Tethyan on September 4th, 2018. The survey will be conducted over an area of approximately 1.6 by 1 kilometres with a line spacing of 80 metres and is designed to test up to 350 metres below surface, depending on the line length. It is anticipated that clay-pyrite alteration which is associated with polymetallic mineralisation will generate chargeability anomalies and therefore aid in designing follow-up drill programmes.

Tethyan is also conducting a trenching and channel sampling program in the same area for approximately 400 metres, and anticipates the arrival of a recently acquired magnetometer and base station within the next six weeks. The magnetometer will initially be used to conduct ground magnetic surveys over priority targets at the Kremice and Kaznovice exploration licences to assist with interpreting structure and zones of magnetite destructive alteration.

Andrew Tunningley, Exploration Manager for Tethyan, commented "Recent drilling results from the Kizevak Southeast prospect demonstrate that high-grade polymetallic mineralisation is coincident with the soil anomaly and comprises sphalerite-galena-pyrite-arsenopyrite vein breccia and fracture fill mineralisation hosted in weakly to moderately clay-pyrite altered andesite. The clay-pyrite alteration is magnetite destructive and is restricted to a fault zone which is inferred as the primary control on mineralisation. The TDIP survey is therefore designed to define the extent of chargeability anomalies potentially associated with the clay-pyrite alteration. The results of the TDIP survey will be assessed together with soil sampling analyses, trench data and magnetic survey results to define additional targets at Kizevak for drilling later this year".

About Tethyan

[Tethyan Resources Plc](#) is a precious and base metals mineral exploration company incorporated in England & Wales and listed on the Toronto Venture Exchange. Tethyan is focused on the Tethyan Metallogenic Belt in Eastern Europe, mainly Serbia, where it is acquiring and exploring a portfolio of quality precious and base metals projects with known mineralisation and compelling drill targets. Tethyan emphasises responsible engagement with local communities and stakeholders, and is committed to proactively implementing Good International Industry Practice (GIIP) and sustainable health, safety and environmental management. More information can be found on our website: www.tethyan-resources.com.

Forward Looking Statements

Certain information contained herein constitutes "forward-looking information" under Canadian securities legislation. Forward-looking information includes, but is not limited to, statements with respect to the design of the geophysical surveys and timing of planned drilling programmes. Generally, forward-looking information can be identified by the use of forward-looking terminology such as "intends", "will be" or variations of such words and phrases or statements that certain actions, events or results "will" occur. Forward-looking statements are based on the opinions and estimates of management as of the date such statements are made and they are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Tethyan to be materially different from those expressed or implied by such forward-looking statements or forward-looking information, including: the receipt of all necessary regulatory approvals, capital expenditures and other costs, and financing and additional capital requirements. Although management of Tethyan have attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements or forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements and forward looking information. Tethyan will not update any forward-looking statements or forward-looking information that are incorporated by reference herein, except as required by applicable securities laws.
