

# Argex Titanium Announces a Major Commercial Agreement

28.11.2018 | [ACCESS Newswire](#)

MONTREAL, November 28, 2018 - [Argex Titanium Inc.](#) (TSX: RGX) ("Argex") is thrilled to announce that significant events necessary to change the TiO<sub>2</sub> industry have now formally started with the execution of a significant agreement which will contribute to its future success and provide substantial benefit to its shareholders.

We are pleased to announce the signing of a long term off-take agreement for our TiO<sub>2</sub> with a major international paint company. This contract provides a substantial base for product supply from our upcoming Technology Center and Commercial plant to be built in Becancour, Quebec.

This contract follows substantial evaluations of our product by five separate independent paint producers, both domestic and foreign, and provides assurance that Argex technology will provide various grades of TiO<sub>2</sub> pigment material for coating applications in the worldwide market.

"This agreement which is the culmination of years of work for Argex provides a sound basis for our economic and technical future. It is rewarding that the confidence placed in Argex by major players in the TiO<sub>2</sub> user industry has fulfilled our ambition for the company. My conviction is that the opportunities for commercial benefit are being realized and our corporate strategy is proving to be sound and viable for a long-term future in the TiO<sub>2</sub> markets" said Mazen Al Naimi, Chairman and CEO.

## About Argex Titanium

[Argex Titanium Inc.](#) has developed an advanced chemical process for the volume production of high-grade titanium dioxide (TiO<sub>2</sub>) for use in high-quality paint, plastics, cosmetics and other TiO<sub>2</sub> applications. The Corporation's unique proprietary process uses relatively inexpensive and plentiful source material from a variety of potential vendors to produce TiO<sub>2</sub>, along with other valuable byproducts. Argex's process provides a significant cost and environmental advantage over current legacy TiO<sub>2</sub> production methods.
