

Barrian Mining Provides Update on its Bolo Drill Program with Six Priority 1 RC Drill Holes Completed and Samples Sent to Laboratory

17.09.2019 | [CNW](#)

VANCOUVER, Sept. 17, 2019 - [Barrian Mining Corp.](#) ("Barrian" or the "Company") (TSX-V: BARI, OTCQB: BARRF, FSE: BM5) is pleased to provide an update on its drill program at the Bolo Gold-Silver Project. To date, six Reverse Circulation (RC) drill holes totaling 1,240 meters have been completed. Samples from all six holes have been sent to ALS Global for multi-element geochemical and gold fire assay analysis. The program remains on budget and on schedule. An additional +500 meters in drilling is anticipated over the coming week(s) to complete the program goal of extending the strike length and depth extent of gold mineralization at Bolo.

Qualitative hand-held portable X-ray Fluorescence (XRF) analysis of RC drill samples has confirmed the presence of pathfinder elements that are a potential indicator of the presence of gold and silver. In particular, elevated arsenic values, which historically correlate well with gold mineralization at Bolo, have been identified within current drill samples cutting the downward projection modelled gold zones. Portable XRF analysis has proven to be a valuable tool in rapidly identifying, in conjunction with chip and sample colour logging, the presence of potential mineralization providing the exploration team with the flexibility to adjust drilling priority in real-time.

Maximilian Sali, CEO and Founder comments "With six holes sent to the lab for analysis the drill program is more than halfway complete with no major issues and staying on budget. The geological crew at APEX and the drillers at New Frontier drilling have executed professional work with indications that drilling has intersected mineralization. Bolo has many Carlin type characteristics and is located in an under-explored area of Nevada. The RC drill samples sent for assay are displaying encouraging signs of mineralization."

About Barrian Mining Corp.

[Barrian Mining Corp.](#) is a new gold exploration company focused on acquiring and advancing precious metal projects in the United States. Barrian's flagship Bolo Project, located 90km northeast of Tonopah Nevada, hosts Carlin type gold mineralization and is fully funded and permitted for its current drill program. In addition, Barrian has an earn-in option to acquire 100% of the "Sleeper Project" which is located in the historic Mogollon epithermal silver-gold mining district of New Mexico. Barrian is run by a strong management and technical team consisting of capital market and mining professionals with the goal of maximizing value for shareholders through new mineral discoveries, committed long-term partnerships, and the advancement of exploration projects in geopolitically favourable jurisdictions. Barrian trades on the TSXV under the ticker symbol "BARI", on the OTC markets under the symbol "BARRF" and on the German (Frankfurt) exchanges using the ticker symbol "BM5".

Qualified Person

The scientific and technical information contained in this news release as it relates to the Bolo Project has been reviewed and approved by Kristopher J. Raffle, P.Geo. (BC) Principal and Consultant of APEX Geoscience Ltd. of Edmonton, AB, a Director of Barrian and a "Qualified Person" as defined in National Instrument 43-101 ‐ Standards of Disclosure for Mineral Projects.

On behalf of the Board of Directors,

/s/ "Max Sali"

Max Sali, Chief Executive Officer

release.

Forward Looking Information

This news release includes certain statements that constitute "forward-looking information" within the meaning of applicable securities law, including without limitation, the ongoing and future drill programs at Bolo, expectations of the drill results, other statements relating to the technical, financial and business prospects of the Company, and other matters.

Forward-looking statements address future events and conditions and are necessarily based upon a number of estimates and assumptions. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved), and variations of such words, and similar expressions are not statements of historical fact and may be forward-looking statements. Forward-looking statements are necessarily based upon a number of factors that, if untrue, could cause the actual results, performances or achievements of the Company to be materially different from future results, performances or achievements express or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which the Company will operate in the future, including the price of metals, anticipated costs and the ability to achieve goals, that general business and economic conditions will not change in a material adverse manner, that financing will be available if and when needed and on reasonable terms, and that third party contractors, equipment and supplies and governmental and other approvals required to conduct the Company's planned exploration activities will be available on reasonable terms and in a timely manner. While such estimates and assumptions are considered reasonable by the management of the Company, they are inherently subject to significant business, economic, competitive and regulatory uncertainties and risks.

Forward-looking statements are subject to a variety of risks and uncertainties, which could cause actual events, level of activity, performance or results to differ materially from those reflected in the forward-looking statements, including, without limitation: (i) risks related to gold and other commodity price fluctuations; (ii) risks and uncertainties relating to the interpretation of exploration results; (iii) risks related to the inherent uncertainty of exploration and cost estimates and the potential for unexpected costs and expenses; (iv) that resource exploration and development is a speculative business; (v) that the Company may lose or abandon its property interests or may fail to receive necessary licences and permits; (vi) that environmental laws and regulations may become more onerous; (vii) that the Company may not be able to raise additional funds when necessary; (viii) the possibility that future exploration, development or mining results will not be consistent with the Company's expectations; (ix) exploration and development risks, including risks related to accidents, equipment breakdowns, labour disputes or other unanticipated difficulties with or interruptions in exploration and development; * competition; (xi) the potential for delays in exploration or development activities or the completion of geologic reports or studies; (xii) the uncertainty of profitability based upon the Company's history of losses; (xiii) risks related to environmental regulation and liability; (xiv) risks associated with failure to maintain community acceptance, agreements and permissions (generally referred to as "social licence"); (xv) risks relating to obtaining and maintaining all necessary government permits, approvals and authorizations relating to the continued exploration and development of the Company's projects; (xvi) risks related to the outcome of legal actions; (xvii) political and regulatory risks associated with mining and exploration; (xix) risks related to current global financial conditions; and (xx) other risks and uncertainties related to the Company's prospects, properties and business strategy. These risks, as well as others, could cause actual results and events to vary significantly.

Factors that could cause actual results to differ materially from those in forward looking statements include, but are not limited to, continued availability of capital and financing and general economic, market or business conditions, the loss of key directors, employees, advisors or consultants, adverse weather conditions, increase in costs, equipment failures, litigation, exchange rate fluctuations, failure of counterparties to perform their contractual obligations and fees charged by service providers. Investors are cautioned that forward-looking statements are not guarantees of future performance or events and, accordingly are cautioned not to put undue reliance on forward-looking statements due to the inherent uncertainty of such statements. The forward-looking statements included in this news release are made as of the date hereof and the Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as

expressly required by applicable securities legislation.
