

Barrian Mining Completes Drill Program with Two Final Holes Targeting the Previously Producing High Grade Silver-Gold Zones

27.09.2019 | [CNW](#)

VANCOUVER, Sept. 27, 2019 - [Barrian Mining Corp.](#) ("Barrian" or the "Company") (TSX-V: BARI, OTCQB: BARRF, FSE: BM5) is pleased to announce that it has completed its summer drill program at Bolo, comprising 10 reverse circulation (RC) drill holes totaling 1,838 metres. Visible alteration indicating potential for mineralization was observed in all drill holes. The focus of drilling was to extend the envelope of high-grade gold mineralization at the South Main Fault Zone. The program was completed on time and on budget, and all drill samples are now with ALS Global for gold fire assay and multi-element analysis.

Maximilian Sali, CEO and Founder comments "We are excited to see the results of Barrian's first drill program at Bolo. Drill hole logging by our geological team identified encouraging zones of alteration and mineralization in all ten holes, and we are confident that it will translate into positive results essential to advancing the Project.

Seven drill holes, totaling 1,338 metres, were completed at the South Mine Fault Zone, testing the extent of mineralization down-dip and along strike. Previous RC drill intercepts at the South Mine Fault area include drill hole BL-38 that graded 3.24 grams-per-tonne (g/t) gold over 30.5 metres within a broader zone of mineralization averaging 1.28 g/t gold over 133 metres*. One drill hole, totaling 177 metres, was completed between the South Mine Fault Zone and Northern Extension Zone, testing both the continuity of mineralization along strike between the known zones, and a linear conductive anomaly identified by the 2019 Induced Polarization and Resistivity geophysical survey. Two drill holes, totaling 323 metres, were completed at the historical Uncle Sam patented claim which has yielded high-grade silver plus gold channel rock chip samples including 3,146 g/t silver and 1.0 g/t gold over 2.6 metres, and 365 g/t silver and 1.9 g/t gold over 3.6 metres** (Image #1). Uncle Sam hosts high grade silver plus gold mineralization at surface and in drill samples, and is the site of historical (circa 1880's) mine workings.

All drill holes completed during the summer program intersected zones of visible alteration typical of Carlin type gold deposit mineralization; including silicification and decalcification of Paleozoic carbonate rocks producing "jasperoids". Intervals of strong iron oxide were also intersected, associated primarily with structural zones. Anomalous pathfinder element (arsenic and antimony) concentrations identified by handheld x-ray fluorescence (XRF) analysis correlate with visible zones of mineralization within the holes analyzed.

*The true width of mineralization is estimated to be approximately 50% of drilled width

** The true width of mineralization at Uncle Sam is unknown. For full descriptions of the Bolo Property mineralized intercepts see: Technical Report on the Bolo Property, Nye County, Nevada, USA effective date October 5, 2018 available at www.sedar.com

About Barrian Mining Corp.

[Barrian Mining Corp.](#) is a new gold exploration company focused on acquiring and advancing precious metal projects in the United States. Barrian's flagship Bolo Project, located 90km northeast of Tonopah Nevada, hosts Carlin type gold mineralization and is fully funded and permitted. In addition, Barrian has an earn-in option to acquire 100% of the "Sleeper Project" which is located in the historic Mogollon epithermal silver-gold mining district of New Mexico. Barrian is run by a strong management and technical team consisting of capital market and mining professionals with the goal of maximizing value for shareholders through new mineral discoveries, committed long-term partnerships, and the advancement of exploration projects in geopolitically favourable jurisdictions. Barrian trades on the TSXV under the ticker symbol "BARI", on the OTC markets under the symbol "BARRF" and on the German (Frankfurt) exchanges using the ticker symbol "BM5".

Qualified Person

The scientific and technical information contained in this news release as it relates to the Bolo Project has been reviewed and approved by Kristopher J. Raffle, P.Geo. (BC) Principal and Consultant of APEX Geoscience Ltd. of Edmonton, AB, a Director of Barrian and a "Qualified Person" as defined in National Instrument 43-101 – Standards of Disclosure for Mineral Projects.

On behalf of the Board of Directors,

/s/ "Max Sali"

Max Sali, Chief Executive Officer

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this news release.

Forward Looking Information

This news release includes certain statements that constitute "forward-looking information" within the meaning of applicable securities law, including without limitation, drill results, completion of assays, other statements relating to the technical, financial and business prospects of the Company, and other matters.

Forward-looking statements address future events and conditions and are necessarily based upon a number of estimates and assumptions. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved), and variations of such words, and similar expressions are not statements of historical fact and may be forward-looking statements. Forward-looking statements are necessarily based upon a number of factors that, if untrue, could cause the actual results, performances or achievements of the Company to be materially different from future results, performances or achievements expressed or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which the Company will operate in the future, including the price of metals, anticipated costs and the ability to achieve goals, that general business and economic conditions will not change in a material adverse manner, that financing will be available if and when needed and on reasonable terms, and that third party contractors, equipment and supplies and governmental and other approvals required to conduct the Company's planned exploration activities will be available on reasonable terms and in a timely manner. While such estimates and assumptions are considered reasonable by the management of the Company, they are inherently subject to significant business, economic, competitive and regulatory uncertainties and risks.

Forward-looking statements are subject to a variety of risks and uncertainties, which could cause actual events, level of activity, performance or results to differ materially from those reflected in the forward-looking statements, including, without limitation: (i) risks related to gold and other commodity price fluctuations; (ii) risks and uncertainties relating to the interpretation of exploration results; (iii) risks related to the inherent uncertainty of exploration and cost estimates and the potential for unexpected costs and expenses; (iv) that resource exploration and development is a speculative business; (v) that the Company may lose or abandon its property interests or may fail to receive necessary licences and permits; (vi) that environmental laws and regulations may become more onerous; (vii) that the Company may not be able to raise additional funds when necessary; (viii) the possibility that future exploration, development or mining results will not be consistent with the Company's expectations; (ix) exploration and development risks, including risks related to accidents, equipment breakdowns, labour disputes or other unanticipated difficulties with or interruptions in exploration and development; * competition; (xi) the potential for delays in exploration or development activities or the completion of geologic reports or studies; (xii) the uncertainty of profitability based upon the Company's history of losses; (xiii) risks related to environmental regulation and liability; (xiv) risks associated with failure to maintain community acceptance, agreements and permissions (generally referred to as "social licence"); (xv) risks relating to obtaining and maintaining all necessary government permits, approvals and authorizations relating to the continued exploration and development of the Company's projects; (xvi) risks related to the outcome of legal actions; (xvii) political and regulatory risks associated with mining and exploration; (xix) risks related to current global financial conditions; and (xx) other risks and uncertainties related to the Company's prospects, properties and business strategy. These risks, as well as others, could cause actual results and events to vary significantly.

Factors that could cause actual results to differ materially from those in forward looking statements include, but are not limited to, continued availability of capital and financing and general economic, market or business conditions, the loss of key directors, employees, advisors or consultants, adverse weather conditions, increase in costs, equipment failures, litigation, exchange rate fluctuations, failure of counterparties to perform their contractual obligations and fees charged by service providers. Investors are cautioned that forward-looking statements are not guarantees of future performance or events and, accordingly are cautioned not to put undue reliance on forward-looking statements due to the inherent uncertainty of such statements. The forward-looking statements included in this news release are made as of

the date hereof and the Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as expressly required by applicable securities legislation.
