The core was logged on-site and will be sawn and sampled by Bam Bam contractors at the secured warehouse facility in Elko, Nevada. Samples will then be submitted to ALS Geochemistry for sample analysis.

Mr. David Greenway, President & CEO, reports: "We are glad to have the Majuba Hill project drilling underway. Following an extensive period of compilation and planning, it is good to finally have core in the box. The alteration and rocks in the core are what our geologists expected and I am looking forward to getting the analytical results from ALS."
