

New Placer Dome Gold Corp. Provides Bolo Gold-Silver Exploration Update & Announces Field Work at Troy Canyon

06.08.2020 | [CNW](#)

VANCOUVER, Aug. 6, 2020 - [New Placer Dome Gold Corp.](#) ("New Placer Dome" or the "Company") (TSX-V: NGLD) (FSE: BM5) is pleased to provide an update on its drill program at the Bolo Gold-Silver Project. To date, five Reverse Circulation (RC) high priority drill holes totaling 1,363 meters have been completed.

Samples from all five holes are being prepared for shipping to ALS Global for multi-element geochemical and gold fire assay analysis. The program remains on budget and on schedule. An additional 2,100 meters in seven holes is anticipated over the coming weeks to complete the programs goal of potentially connecting two zones, the South Mine Fault and Uncle Sam zones and targeting new discoveries below the previous drill intercepts where gold mineralization remains open at depth.

Qualitative hand-held portable X-ray Fluorescence (XRF) analysis of the RC drill samples has confirmed the presence of pathfinder elements that are a potential indicator of the presence of gold and silver mineralization. In particular, elevated downhole arsenic values, an effective real-time targeting tool used during the 2020 drill campaign, have been identified within current drill samples cutting the down-dip projection of gold zones.

Troy Canyon Project

In addition to having an active RC drill campaign underway at the Bolo Gold Project, and Kinsley Mountain Project (Figure 1), New Placer Dome anticipates mobilization of a ground exploration team to complete initial assessment of its early-stage Troy Canyon gold and silver project ("Troy Canyon Project") in the coming days. The 593 hectare Troy Canyon Project is located in Nye County just 70 km east of Bolo.

The Troy Gold-Silver Project has seen limited modern exploration effort, and was a former small producer. Gold mineralization was first identified at the project in 1867 and small-scale mining commenced in 1869. The most recent mining took place from 1948 to 1950 where 643 ounces of gold and 660 ounces of silver were reportedly produced from 1,859 tons of mineralized rock, at an average grade of 11.83 g/t gold (0.345 oz/t Au) and 12 g/t silver (0.355 oz/t Ag). More recent work completed by a previous operator returned select high grade underground stope rock grab samples grading 47.8 g/t gold, 48.4 g/t gold, and 576 g/t gold (16.8 oz/ton Au; See New Placer Dome Corp. News Release dated October 11, 2019).

About New Placer Dome Gold Corp.

[New Placer Dome Gold Corp.](#) is a gold exploration company focused on acquiring and advancing gold projects in Nevada. New Placer Dome's flagship Kinsley Mountain Gold Project, located 90 km south of the Long Canyon Mine (currently in production under the Newmont/Barrick Joint Venture), hosts Carlin-style gold mineralization, previous run of mine heap leach production, and NI 43-101 indicated resources containing 418,000 ounces of gold grading 2.63 g/t Au (4.95 million tonnes) and inferred resources containing 117,000 ounces of gold averaging 1.51 g/t Au (2.44 million tonnes)¹. The Bolo Project, located 90 km northeast of Tonopah, Nevada, is another core asset, similarly hosting Carlin-style gold mineralization. New Placer Dome also holds an option to acquire 100% of the Troy Canyon Project, located 120 km south of Ely, Nevada. New Placer Dome is run by a strong management and technical team consisting of capital market and mining professionals with the goal of maximizing value for shareholders through new mineral discoveries, committed long-term partnerships, and the advancement of exploration projects in geopolitically favourable jurisdictions.

Qualified Person

The scientific and technical information contained in this news release has been reviewed and approved by Kristopher J. Raffle, P.Geo. (BC) Principal and Consultant of APEX Geoscience Ltd. of Edmonton, AB, a Director of New Placer Dome Corp., and a "Qualified Person" as defined in National Instrument 43-101 – Standards of Disclosure for Mineral Projects. Mr. Raffle verified the data disclosed which includes a review of the analytical and test data underlying the information and opinions contained therein.

On behalf of the Board of Directors,

Forward Looking Information

This news release includes certain statements that constitute "forward-looking information or statements" within the meaning of applicable securities law, including without limitation, conducting exploration work on its projects, other statements relating to the technical, financial and business prospects of the Company and its properties, and other matters.

Forward-looking statements address future events and conditions and are necessarily based upon a number of estimates and assumptions. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved), and variations of such words, and similar expressions are not statements of historical fact and may be forward-looking statements. Forward-looking statements are necessarily based upon a number of factors that, if untrue, could cause the actual results, performances or achievements of the Company to be materially different from future results, performances or achievements expressed or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which the Company will operate in the future, including the price of metals, anticipated costs and the ability to achieve goals, that general business and economic conditions will not change in a material adverse manner, that financing will be available if and when needed and on reasonable terms, and that third party contractors, equipment and supplies and governmental and other approvals required to conduct the Company's planned exploration activities will be available on reasonable terms and in a timely manner. While such estimates and assumptions are considered reasonable by the management of the Company, they are inherently subject to significant business, economic, competitive and regulatory uncertainties and risks.

Forward-looking statements are subject to a variety of risks and uncertainties, which could cause actual events, level of activity, performance or results to differ materially from those reflected in the forward-looking statements, including, without limitation: (i) risks related to gold and other commodity price fluctuations; (ii) risks and uncertainties relating to the interpretation of exploration results; (iii) risks related to the inherent uncertainty of exploration and cost estimates and the potential for unexpected costs and expenses; (iv) that resource exploration and development is a speculative business; (v) that the Company may lose or abandon its property interests or may fail to receive necessary licences and permits; (vi) that environmental laws and regulations may become more onerous; (vii) that the Company may not be able to raise additional funds when necessary; (viii) the possibility that future exploration, development or mining results will not be consistent with the Company's expectations; (ix) exploration and development risks, including risks related to accidents, equipment breakdowns, labour disputes or other unanticipated difficulties with or interruptions in exploration and development; (x) competition; (xi) the potential for delays in exploration or development activities or the completion of geologic reports or studies; (xii) the uncertainty of profitability based upon the Company's history of losses; (xiii) risks related to environmental regulation and liability; (xiv) risks associated with failure to maintain community acceptance, agreements and permissions (generally referred to as "social

licence"); (xv) risks relating to obtaining and maintaining all necessary government permits, approvals and authorizations relating to the continued exploration and development of the Company's projects; (xvi) risks related to the outcome of legal actions; (xvii) political and regulatory risks associated with mining and exploration; (xix) risks related to current global financial conditions; and (xx) other risks and uncertainties related to the Company's prospects, properties and business strategy. These risks, as well as others, could cause actual results and events to vary significantly.

Factors that could cause actual results to differ materially from those in forward looking statements include, but are not limited to, continued availability of capital and financing and general economic, market or business conditions, the loss of key directors, employees, advisors or consultants, adverse weather conditions, increase in costs, equipment failures, government regulations and policies, litigation, exchange rate fluctuations, the impact of Covid-19 or other viruses and diseases on the Company's ability to operate, failure of counterparties to perform their contractual obligations and fees charged by service providers. Investors are cautioned that forward-looking statements are not guarantees of future performance or events and, accordingly are cautioned not to put undue reliance on forward-looking statements due to the inherent uncertainty of such statements. The forward-looking statements included in this news release are made as of the date hereof and the Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as expressly required by applicable securities legislation.
