Wes Hanson, President and CEO of Xplore, stated, "The Birch-Uchi greenstone belt is seeing a surge in exploration activity as companies resume active exploration of a district with favourable geology and recent gold discoveries. Geological Survey of Canada (GSC) field programs in 1991 and 1992 returned gold in till anomalies along a 5 kilometer E-W trend along the southern portion of the Upper Red Lake Property. To the east, follow up gold in till results have confirmed the initial GSC results. We are currently considering options to advance the Upper Red Lake Project in 2021 to evaluate the geological potential of the property."
