

American Creek Reports That JV Partner Tudor Gold Completes Initial Mineral Resource Estimate at Treaty Creek

09.03.2021 | [Newsfile](#)

19.4 Million Ounces of 0.74 gpt AuEq of Measured and Indicated Mineral Resources and 7.9 Million Ounces of 0.79 gpt AuEq of Inferred Mineral Resources

Cardston, March 9, 2021 - [American Creek Resources Ltd.](#) (TSXV: AMK) ("the Company") is pleased to present results of the Initial Mineral Resource Estimate for the Goldstorm and Copper Belle Zones at their flagship property, Treaty Creek. The Property is located within the heart of the Golden Triangle of Northwestern British Columbia which is on-trend from Seabridge's KSM Project located five kilometres southwest of the Goldstorm Zone. A total of 218 drill holes totaling 105,658.8 metres were used in the Mineral Resource Estimate completed by P&E Mining Consultants Inc. (P&E). The constraining open-pit shell contains 14.15 million ounces of Measured and Indicated gold equivalent ounces ("AuEq") at an average grade of 0.72 gpt AuEq and 5.26 million Measured and Indicated AuEq ounces at an average grade of 0.80 gpt AuEq for the out-of-pit Mineral Resources. Cut-off grades of 0.30 gpt AuEq were used inside the constraining open-pit shell and a higher cut-off grade of 0.46 gpt AuEq was used for the out-of-pit Mineral Resource Estimate which includes underground constrained blocks. The Goldstorm Zone remains open in all directions and at depth. The effective date of the Mineral Resource Estimate is March 1, 2021. A Technical Report prepared in accordance with National Instrument 43-101, Standards of Disclosure for Mineral Projects, will follow within 45 days of this news release and this will be posted on SEDAR and the Company's website.

Tudor Gold's Vice President of Exploration and Project Development, Ken Konkin, P.Geo., stated: "We are very pleased with the results obtained from our Initial Mineral Resource Estimate. Only 10-12 % of the gold equivalent values are attributed to silver and copper mineralization indicating a strong gold-dominate system. However, due to the immense volume of the system, it contains large quantities of silver and copper. Further studies are required to investigate the potential economic impact of these two metals. Our preliminary metallurgical test work shows excellent gold recoveries to a gravity + flotation concentrate. From four composite tests, gold recoveries averaged 96.2% in pyrite concentrates with overall gold recoveries after concentrate extraction expected to be on the order of 88%. The mineralogical studies also demonstrated that no deleterious elements such as As, Sb or Hg were detected within the Goldstorm and Copper Belle Zones. The four tests were carried out by BV Minerals Metallurgical Division and supervised by metallurgical consultant Frank Wright, P.Eng.

Our plans for 2021 are to complete the drilling of the Goldstorm Zone; to define the limits of the 300 Horizon, the CS-600 and DS-5 Zones. In-addition, diamond drilling is planned for the Eureka and Perfect Storm Zones. We believe that the Treaty Creek Property contains excellent potential for continued discovery of gold-silver-copper systems such as Goldstorm."

Mineral Estimate Highlights include:

- The classifications of Measured, Indicated and Inferred Mineral Resources for gold, silver, copper and gold-equivalents and their respective tonnage are listed in Table 1 below. In addition to the 17.33 million ounces of gold Measured and Indicated Mineral Resource and 7.22 million ounces of gold Inferred Mineral Resource, there are 93.41 million ounces of silver estimated as Measured and Indicated Mineral Resources with an additional 40.57 million ounces of Inferred silver Mineral Resource. The Measured and Indicated Mineral Resource also estimates 1.096 billion pounds of copper with an additional 330 million pounds of copper as an Inferred Mineral Resource.
- A bulk density of 2.80 t/m³ was based on measurements taken by P&E during their field visits.
- 5m x 5m x 5m three-dimensional block model was used for the Mineral Resource Estimate. Measured Mineral Resources are informed by four of more drill holes within 100 metres; Indicated Mineral Resources are informed by four of more drill holes within 200 metres.

TABLE 1: INITIAL MINERAL RESOURCE ESTIMATE SUMMARY

Pit Constrained Mineral Resource Estimate

Classification	Cut-Off AuEq gpt	Tonnes Million	Au gpt	Ag gpt	Cu %	AuEq gpt	Au M oz	Ag M oz	Cu M lb	AuEq M oz
Measured	0.30	283.2	0.71	2.90	0.03	0.76	6.49	25.96	187.3	6.89
Indicated	0.30	326.6	0.59	3.50	0.08	0.69	6.21	37.25	583.2	7.26
Meas & Ind	0.30	609.8	0.65	3.20	0.06	0.72	12.70	63.20	770.5	14.15
Inferred	0.30	139.4	0.72	3.60	0.04	0.77	3.22	16.29	113.7	3.46

Out-of-Pit Mineral Resource Estimate

Classification	Cut-Off AuEq gpt	Tonnes Million	Au gpt	Ag gpt	Cu %	AuEq gpt	Au M oz	Ag M oz	Cu M lb	AuEq M oz
Measured	0.46	15.4	0.71	3.90	0.06	0.79	0.35	1.95	19.0	0.39
Indicated	0.46	190.5	0.70	4.60	0.07	0.80	4.28	28.26	306.6	4.88
Meas & Ind	0.46	205.9	0.70	4.60	0.07	0.80	4.63	30.21	325.6	5.26
Inferred	0.46	172.3	0.72	4.40	0.06	0.80	4.00	24.28	216.5	4.43

Total Mineral Resource Estimate

Classification	Cut-Off AuEq gpt	Tonnes Million	Au gpt	Ag gpt	Cu %	AuEq gpt	Au M oz	Ag M oz	Cu M lb	AuEq oz
Measured	0.30 & 0.46	298.6	0.71	2.90	0.03	0.76	6.84	27.91	206.3	7.28
Indicated	0.30 & 0.46	517.1	0.63	3.90	0.08	0.73	10.49	65.50	889.8	12.13
Meas & Ind	0.30 & 0.46	815.7	0.66	3.60	0.06	0.74	17.33	93.41	1,096.1	19.41
Inferred	0.30 & 0.46	311.7	0.72	4.00	0.05	0.79	7.22	40.57	330.2	7.90

1. Mineral Resources are not Mineral Reserves do not have demonstrated economic viability. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, socio-political, marketing, or other relevant issues. There is no certainty that Mineral Resources will be converted to Mineral Reserves.
2. The Inferred Mineral Resource in this estimate has a lower level of confidence than that applied to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of the Inferred Mineral Resource could be upgraded to an Indicated Mineral Resource with continued exploration.
3. The Mineral Resources in this news release were estimated in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum (CIM), CIM Standards on Mineral Resources and Reserves, Definitions (2014) and Best Practices Guidelines (2019) prepared by the CIM Standing Committee on Reserve Definitions and adopted by the CIM Council.
4. Metal prices used were US\$1,625/oz Au, US\$19/oz Ag, US\$2.80/lb Cu with process recoveries of 88% Au, 30% Ag and 80% Cu. A C\$16.50/tonne process and C\$2 G&A cost were used.
5. The constraining pit optimization parameters were C\$2.50/t mineralized and waste material mining cost and 50-degree pit slopes with a 0.30 gpt AuEq cut-off.
6. The out-of-pit parameters were at a C\$10/t large scale bulk mining cost. The out-of-pit Mineral Resource grade blocks were quantified above the 0.46 gpt AuEq cut-off, below the constraining pit shell and within the constraining mineralized wireframes. Out-of-Pit Mineral Resources exhibit continuity and reasonable potential for extraction by a bulk underground mining method.

Walter Storm, President and CEO, stated: "We are extremely pleased with our exploration efforts and the resulting Initial Mineral Resource Estimate indicating that Treaty Creek could be one of the world's largest gold discoveries of the decade. We completed a very difficult exploration year under strict COVID-19

protocols and maintained an excellent safety record. The Goldstorm Zone remains open on all fronts and to depth, and our priority for 2021 will be to complete the drilling to the Northeast and Southeast limits as well as to depth. The objective will be to convert as much of the 7.9 million ounces of Inferred Mineral Resource averaging 0.79 gpt AuEq to Measured and Indicated Resource classifications, in addition to finding the limits to the mineralized zones within the Goldstorm Zone. Our geological team is currently planning the 2021 exploration program that will also include drilling of the newly discovered Perfect Storm Zone as well as the Eureka Zone. The goal is to add to the current Au-Ag-Cu Mineral Resource of Treaty Creek".

Darren Blaney, CEO of American Creek, commented: "We are thrilled with this initial resource estimate as it not only ranks as one of the largest gold discoveries in the past decade, but is also the reward for many years of perseverance, dedication and effort by all involved. We wish to congratulate and thank the Tudor Gold team and More Core drilling team for their expertise and dedication in making this possible. We also sincerely thank our shareholders for their significant and ongoing support over the years and we are excited to share in this accomplishment together. Equally exciting is that the Goldstorm zone remains open in all directions and at depth. Further, there is significant potential for other discoveries on the property with Tudor now formulating plans to drill those areas in the upcoming drill program."

QA/QC

Drill core samples were prepared at the MSA Laboratories ("MSA") Preparation facility in Terrace, BC and assayed at MSA's Geochemical Laboratory in Langley, BC. Analytical accuracy and precision are monitored by the submission of blanks, certified standards and duplicate samples inserted at regular intervals into the sample stream by Tudor Gold personnel. MSA Laboratories quality system complies with the requirements for the International Standards ISO 17025 and ISO 9001. MSA is independent of the Company.

Qualified Person

Eugene Puritch, P.Eng. of P&E Mining Consultants Inc. is the Qualified Persons, as defined in National Instrument 43-101 Standards of Disclosure for Mineral Projects, who have reviewed and approved of the scientific and technical disclosure in this news release. Mr. Puritch is independent of the Company.

The Qualified Person for this news release is James A. McCrea, P. Geo., for the purposes of National Instrument 43-101. While American Creek has not independently confirmed Tudor's information, Mr. McCrea has read and approved the scientific and technical information that forms the basis for the disclosure contained in this news release.

Treaty Creek JV Partnership

The Treaty Creek Project is a Joint Venture with Tudor Gold owning 3/5th and acting as operator. American Creek and Teuton Resources each have a 1/5th interest in the project creating a 3:1 ownership relationship between Tudor Gold and American Creek. American Creek and Teuton are both fully carried until such time as a Production Notice is issued, at which time they are required to contribute their respective 20% share of development costs. Until such time, Tudor is required to fund all exploration and development costs while both American Creek and Teuton have "free rides".

About American Creek

American Creek is a Canadian junior mineral exploration company with gold and silver properties in British Columbia, Canada.

The Company has an interest in the Treaty Creek property, a joint venture project with Tudor Gold/Walter Storm located in BC's prolific "Golden Triangle".

The Company also holds the Austruck-Bonanza gold property located near Kamloops.

For further information please contact Kelvin Burton at: Phone: 403 752-4040 or Email: info@americancreek.com. Information relating to the Corporation is available on its website at www.americancreek.com

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

Cautionary Statements regarding Forward-Looking Information

This news release contains "forward-looking information" within the meaning of applicable Canadian Securities legislation. "Forward-looking information" includes, but is not limited to, statements with respect to the activities, events or developments that the Company expects or anticipates will or may occur in the future, including Tudor Gold's plan to file a technical report within 45 days of this news release, the plan for Tudor Gold to complete the drilling of the Goldstorm Zone and define the limits of the 300 Horizon, the CS-600 and DS-5 Zones and the plan to drill the Perfect Storm Zone and the Eureka Zone in 2021. Generally, but not always, forward-looking information and statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", or "believes" or the negative connotation thereof or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved" or the negative connotation thereof.

Such forward-looking information and statements are based on numerous assumptions, including among others, that Tudor Gold will file a technical report within 45 days of this news release, that Tudor Gold will complete the drilling of the Goldstorm Zone and will define the limits of the 300 Horizon, the CS-600 and DS-5 Zones and that Tudor Gold will drill the Perfect Storm Zone and the Eureka Zone on the timeline anticipated by management. Although the assumptions made by the Company in providing forward-looking information or making forward-looking statements are considered reasonable by management at the time, there can be no assurance that such assumptions will prove to be accurate.

There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from the Company's plans or expectations include that Tudor Gold will not file a technical report within 45 days of this news release or at all, that Tudor Gold will not complete the drilling of the Goldstorm Zone and will be unable to define the limits of the 300 Horizon, the CS-600 and DDS-5 Zones and Tudor Gold will not drill the Perfect Storm Zone and the Eureka Zone on the timeline anticipated by management or at all and other risks detailed herein and from time to time in the filings made by the Company with securities regulators.

Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in the forward-looking information or implied by forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking information and statements will prove to be accurate, as actual results and future events could differ materially from those anticipated, estimated or intended. Accordingly, readers should not place undue reliance on forward-looking statements or information.

The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise except as otherwise required by applicable securities legislation.
