

# Southwestern Energy Expands Leading RSG Well Certification and Monitoring Program Across Entire Operations

08.02.2022 | [Business Wire](#)

Positioned to become the largest producer of RSG in Haynesville

[Southwestern Energy Company](#) (NYSE: SWN) (the "Company" or "Southwestern") announced the expansion of its Company-wide certification and continuous monitoring of its production as responsibly sourced gas ("RSG"), building upon its previously announced program in Appalachia to include its newly acquired Haynesville position. SWN's RSG program reflects the Company's leading Environmental, Social and Governance ("ESG") performance objectives and aligns with its broader corporate strategy to generate sustainable cash flow from responsible natural gas development.

## Key Highlights:

- Independent certification includes analysis of 5x more data points than competing certifications assessing air, land, water, community and operational impacts
- Pad-level continuous monitoring utilizing the most comprehensive emissions detection approach
- Independent certification of the Company's Haynesville production expected to be completed by the end of 2022; Appalachia certifications expected to be completed in March 2022
- Will increase Southwestern's total certified responsibly sourced gas to over 5 Bcf per day of gross operated production

"Southwestern Energy's commitment to obtain third-party certification for our entire portfolio across Appalachia and Haynesville allows our stakeholders to receive independent verification that all of SWN's production meets and exceeds the highest and most rigorous RSG standards," said Bill Way, Southwestern Energy President and Chief Executive Officer.

"The ability to monitor emissions from our operations at the pad level is a clear differentiator and will allow SWN to efficiently and effectively reduce emissions. This core initiative is a tangible way SWN is responsibly developing natural gas, which is foundational to a lower carbon future," continued Way.

Southwestern Energy is utilizing Project Canary's TrustWell standards and Canary X continuous monitoring devices for its entire portfolio in both the Appalachia and Haynesville basins. Project Canary, a Denver-based Public Benefit Corp, is the leading provider of independent environmental performance certification and precise continuous emissions monitoring technology. Project Canary assessment and certification analysis is the most rigorous and comprehensive certification available where engineers and data scientists analyze more than 600 unique data points within 24 operational categories to develop per-well environmental performance scores.

"As the certified gas market evolves, verified, high-fidelity data is a key differentiator to credible and high-quality RSG certifications," said Project Canary Co-founder and CEO Chris Romer. "Southwestern moves the industry forward on comprehensive ESG performance that the measurement economy requires. The Project Canary certification verifies their commitment to the highest standards in the industry."

## About Southwestern Energy

[Southwestern Energy Company](#) (NYSE: SWN) is a leading U.S. producer of natural gas and natural gas liquids focused on responsibly developing large-scale energy assets in the nation's most prolific shale gas basins. SWN's returns-driven strategy strives to create sustainable value for its stakeholders by leveraging its scale, financial strength and operational execution.
