

# Engineer Gold Mines Ltd. Provides an update on Private Placement Tranche Two Closes

22.12.2022 | [The Newswire](#)

Vancouver, December 21, 2022 - [Engineer Gold Mines Ltd.](#) (the "Company") (TSXV:EAU) The Private Placement first announced on October 13, 2022 has closed raising a total of \$209,500. The first tranche closed on November 10, 2022 for 6,100,000 units ("Unit") raising gross proceeds of \$152,500. The second and final tranche closed today for 2,280,000 units raising gross proceeds of \$57,000. The private placement units are priced at \$0.025 per Unit. Each Unit is comprised of one common share and one share purchase warrant (a "Warrant"). Each Warrant is exercisable to purchase one common share of the Company at a price of \$0.10 per share expiring 60 months from the date of closing.

If, at any time after the closing date, the corporation's common shares have a closing price of 15 cents or more per share for 10 consecutive trading days on the TSX Venture Exchange, the corporation shall be entitled to give notice via a news release that the warrants issued pursuant to this placement will expire 30 days from the date of the news release, unless such warrants are exercised before the expiry of that period, and in such event, all unexercised warrants will expire at 4:30 p.m. Pacific time on the last day of such 30 day period.

Commissions of \$11,600 and 464,000 finders warrants exercisable to purchase one common share of the Company at a price of \$0.10 per share expiring on November 10, 2027 were issued in connection with the first tranche. Commissions of \$2,000 and 80,000 finders warrants exercisable to purchase one common share of the Company at a price of \$0.10 per share expiring on December 21, 2027 were issued in connection with the second tranche.

Proposed use of proceeds can include up to: 55% geological compilation, exploration program development & consulting; 15% non-arms length payments; 20% general working capital purposes and 10% Investor Relations.

The private placement is subject to TSX Venture Exchange approval and all securities are subject to a four month hold period in accordance with the policies of the TSX Venture Exchange.

## About the Properties

**Engineer Gold Mine:** The Engineer Gold mine is a narrow vein past producing underground gold mine with an Inferred Mineral Resource of 41,000 t grading 19.0 g/t gold for 25,000 oz contained gold. The resource uses a cutoff grade of 5 g/t Au and assumes a 1m minimum mining width, which is similar to historical mining. It includes all material inside the mineralized shoots and is based on the payability (stope) limits. Within this resource is a higher-grade core of 14,000t grading 52.5 g/t gold (25 g/t gold Cut-Off) containing 23,600 oz contained gold. The resource grade was reconciled to a bulk tonnage sample which contained 175 tonnes at 23.9 g/t Au which is 16% higher than the resource grade of 20.6 g/t Au for the Engineer portion of the resource. This is considered acceptable for a nuggety gold deposit and exemplifies the potential conservatism of the 2018 resource. This resource estimate was initially calculated by Snowden Mining Industry Consultants Ltd. in 2011 and re-stated in the 2018 NI 43-101 Technical Report.

Note that this resource estimate predates the 2019 CIM Guidelines for NI 43-101 reporting. The

Company has done no further work to confirm this historical resource and should not be relied upon.

**Tag:** The Tag area covers the 025 or Main zone, which contains an historical mineral resource estimate including 250,000 tonnes of Indicated material at average grades of 2.97 g/t Au and 12.09 g/t Ag, and an Inferred resource of 400,000 tonnes at average grades of 2.98 g/t Au and 9.91 g/t Ag. The resource estimate

was calculated using the polygonal method with vertical section at 50m spacing, and grades composited over a minimum length of 2.0 meters. The Au was capped at a value of 4 g/t and Ag was capped at 25 g/t. Underground mining was assumed with all material having a minimum composited length of 2m, within the interpreted shapes and above the cutoff assumed to be amenable to underground mining. The cut-off grade used was 3.0 g/t gold equivalent, calculated with a silver to gold ratio of 59.927. This historical resource was published as an NI 43-101 report filed on SEDAR entitled "Technical Report on Resource Estimates for the Tag Property, Northern British Columbia", prepared for CZM Capital Corporation by Reddick Consulting Inc. and dated December 29, 2009. Note that this estimate predates the 2019 CIM Guidelines for NI 43-101 reporting. The Company has done no further work to confirm this historical resource and should not be relied upon.

Wann River: The Wann River area has seen grab samples from the Lum showing with up to 263 g/t Au and 1350 g/t Ag reported in 2010. Adjacent to the prolific Llewellyn fault, the Wann River project holds potential for significant further exploration and discovery.
