

SANTO to Develop Badbunniez NFTs on the CHIMBA Blockchain

29.12.2022 | [ACCESS Newswire](#)

MEDELLIN, December 29, 2022 - [Santo Mining Corp.](#), d.b.a. Santo Blockchain Labs (OTC PINK:SANP) today announces, it will develop the Badbunniez NFTs on the CHIMBA Blockchain. Badbunniez are the first R-Rated, generative NFT drop on the CHIMBA Blockchain inspired by gamer favorites such as Final Fantasy VII, Mortal Kombat, God of War, Dragon Ball Z, Planet of the Apes, BYAC & Bloody Bunny. The Company is expected to have all 11,111 Badbunniez NFTs ready by late Q1 or mid Q2, on the CHIMBA Blockchain.

Mr. Yglesias CEO of Santo Blockchain Labs stated; "we are stoked to develop one of the first use cases for the CHIMBA Blockchain and that to be the Badbunniez NFTs, the NFT market will continue to grow and we expect that the next 5 years the NFT market will grow exponentially."

ABOUT BADBUNNIEZ:

The Badbunniez project aims to create the first anime and game-inspired NFT collection, which will lead to the ultimate goal of developing a play-to-earn R-rated blockchain-based game. GameFi is the heart and soul of this project. Badbunniez NFTs plans to merge DeFi, NFTs, metaverse concepts, and mature content gaming into a first-of-its-kind PvP battle and survival mode apocalyptic game built ideally with Unity or Unreal Engine to lead the pack in the emergence of GameFi. The inspiration behind the Badbunniez project, character, and the badbunniez family (TBD), come from some of the best-selling and well-known titles in the gaming industry. For example, Kratos from God of War heavily influences Badbunniez character design, Cloud from Final Fantasy, Vegeta from Dragonball Z, Bloody Bunny, Mortal Kombat characters, and Wolverine from X-Men. We will be drawing inspiration and incorporating elements from various other anime and popular video games as we continue to build out the project roadmap, with some very cool and exciting things to come shortly. Badbunniez is NOT for everyone. Badbunniez is for those that love gore, love trash-talking, enjoy mature gaming content, and don't give a sh*t what others think. We are building this for the true gaming community and NFT lovers that are tired of seeing sh*tty looking penguins and ugly looking apes. We're here to cause chaos and disturb the peace. Badbunniez from the underworld is going to become the most fantastic NFT project you've ever seen as we look to set a new standard, lead the pack, and innovate new blockchain-related gaming and NFT elements that break all the rules. To follow Badbunniez launch date information and roadmap updates, follow us on Twitter [here](#)!

ABOUT CHIMBA BLOCKCHAIN:

<https://chimba.ooo/> CHIMBA is the first Colombian blockchain developed on the COSMOS NETWORK for Colombians. CHIMBA Blockchain is actually a decentralized blockchain network, with the ability for local developers using our CHIMBA SDK to create applications or blockchains in the CHIMBA ecosystem, parallel and independent. CHIMBA Blockchain is a project focused on Colombia, to provide an infrastructure capable of uniting several independent blockchains, being part of the COSMOS NETWORK HUB and making them interoperable with each other. The intention of CHIMBA Blockchain is to allow these local blockchains, the value and the applications to run on them, to communicate with each other using a standard that guarantees said operations and that they can be carried out quickly.

ABOUT SANTO:

The Company is a vertically integrated blockchain and cryptocurrency company that manages, operates, and develops end-to-end "BaaS" Blockchain-as-a-Service, similar to software-as-a-service, blockchain as a service lets businesses get applications up and running with minimal hassle.

FORWARD-LOOKING STATEMENTS:

Because we want to provide more meaningful and useful information, this Disclosure Statement contains certain "forward-looking statements" (as such term is defined in Section 21E of the Securities Exchange Act of 1934, as amended). These statements reflect our current expectations regarding our possible future results of operations, performance, and achievements. These forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, regulation of the Securities and Exchange Commission, and common law.

Such statements use such words as " may", " would", " will", " intend", " expect", " believe", " plan", " anticipate", " and other similar terminology. Specifically, and without limiting the generality of the foregoing, this report contains forward looking statements relating to (i) expectations regarding the future trading and value of bitcoin (ii) the anticipated performance of the Company, including anticipated future revenue and profit and number of machines (iii) the anticipated timing and ability of the Company to further expand internationally (iv) the ability of the Company to complete future acquisitions (v) anticipated future expenses of the Company (vi) the Company's business plans and objectives, including the expansion of its ATMs, its relationships with additional hosts and retailers and the integration and success of new software and web based services (vii) the anticipated timing for the mining and introduction of additional bitcoin (viii) the anticipated success and integration of the Company's SANTO PAY software (ix) expectations regarding the increased use of bitcoin as payment and (x) the Company's goals with respect to its anticipated future revenue sources (including web based revenue) and the timing thereof. By their very nature, forward looking statements involve inherent risks and uncertainties, both general and specific, which give rise to the possibility that predictions, forecasts, projections and other forward looking statements will not be achieved. Forward looking statements are based on management's opinions, estimates and assumptions in light of its experience and perception of historical trends, current conditions and expected future developments, as well as other factors that management currently believes are appropriate and reasonable in the circumstances, including expectations and assumptions concerning prevailing currency prices and differentials, exchange rates, the sufficiency of budgeted capital expenditures in carrying out planned activities, the timing of future acquisitions, the state of the economy and the bitcoin industry, results of operations, performance, business prospects and opportunities, the impact of competition, the ability to efficiently integrate assets and employees acquired through acquisitions and capital markets, generally. There can be no assurance that the underlying opinions, estimates and assumptions, and consequently the forward looking statements and actual results, will prove to be correct.
