

Joint Venture Spuds Wei-1 Well Offshore Guyana

23.01.2023 | [CNW](#)

Aiming To Build On Light Oil And Condensate Discovery At Kawa-1

TORONTO, Jan. 23, 2023 - [CGX Energy Inc.](#) (TSXV: OYL) ("CGX") and [Frontera Energy Corp.](#) (TSX: FEC) ("Frontera") joint venture partners (the "Joint Venture") in the Petroleum Prospecting License for the Corentyne block offshore Guyana (the "License"), announce today that the Joint Venture has spud the Wei-1 well, on the Corentyne block, approximately 200 kilometres offshore from Georgetown, Guyana.

The Joint Venture also announces that the Government of Guyana has approved an Appraisal Plan for the northern section of the Corentyne block which commenced with the Wei-1 well. Following completion of Wei-1 drilling operations and upon detailed analysis of the results, the Joint Venture may consider future wells per its appraisal program to evaluate possible development opportunities in the Kawa-1 discovery area and throughout the northern section of the Corentyne block. Any future drilling is contingent on positive results at Wei-1 and the Joint Venture has no further drilling obligations beyond the Wei-1 well.

The Wei-1 well is located approximately 14 kilometres northwest of the Joint Venture's previous Kawa-1 light oil and condensate discovery and will be drilled in water depth of approximately 1,912 feet (583 metres) to an anticipated total depth of 20,000 feet (6,248 metres). The Wei-1 well will target Maastrichtian, Campanian and Santonian aged stacked sands within channel complexes in the northern section of the Corentyne block. The well is expected to take approximately 4-5 months to reach total depth.

Professor Suresh Narine, Executive Co-Chairman of CGX's Board of Directors, commented:

"The Joint Venture is pleased to announce that it has spud the Wei-1 well offshore Guyana, and that the Government of Guyana has approved the Joint Venture's appraisal program. Wei-1 will appraise both the Kawa-1 discovery as well as explore other opportunities within the Corentyne block. The Wei-1 well is on-trend and positioned for success with both Kawa-1 and other discoveries immediately adjacent to the northern section of the Corentyne block. The Joint Venture is grateful for the Government of Guyana's ongoing support as the Joint Venture worked towards spudding Wei-1 in-line with the previously agreed terms of the License."

Orlando Cabrales, Chief Executive Officer of Frontera, commented:

"We are very excited about the potentially transformational opportunity that is now before us on the Corentyne block in one of the most exciting exploration areas in the world and we look forward to safely and successfully drilling the Wei-1 well and potentially extending the Joint Venture's recent light oil and condensate discovery at the Kawa-1 well."
