# Hycroft Announces Year End 2022 Operating And Financial Results

29.03.2023 | PR Newswire

WINNEMUCCA, March 28, 2023 - Hycroft Mining Holding Corp. (Nasdaq: HYMC) ("Hycroft" or "the Company"), a gold development company that owns the Hycroft Mine in the prolific mining region of Northern Nevada, announces operatir financial results for the year ended December 31, 2022. Today, the Company filed its Annual Report on Form 10-K for ended December 31, 2022, and the Hycroft Property Initial Assessment Technical Report Summary, Humboldt and Per Counties, Nevada, effective March 27, 2023 ("2023 Hycroft TRS"). Both are available at www.sec.gov/edgar. A new co presentation is available on our website at www.hycroftmining.com. See "Cautionary Note Regarding Forward Looking below.

# 2022 Corporate Highlights:

- Safety: Hycroft's safety performance continued to improve significantly reaching a ZERO Total Recordable Injury Rate (TRIFR) per 200,000 man-hours worked (including contractors) at year-end 2022, representing a 100% redu 0.64 at the end of 2021. The mining industry TRIFR average for 2022 was 2.017. Currently, the Company's TRIF ZERO incidents or accidents.
- Production: Gold and silver sales for the year ended December 31, 2022, were 17,728 ounces and 44,084 ounce
  respectively. Processing of ore on the leach pads from prior mining operations ceased in December 2022.
- Revenue: Revenue from gold and silver sales totaled \$32.2 million and \$1.0 million, respectively, for the year end December 31, 2022.
- Cash Position: The Company ended 2022 with \$142 million of unrestricted cash, \$34 million of restricted cash, are compliance with debt covenants.

# 2022 Exploration Highlights:

• The Company launched its 2022-2023 Exploration Drill Program in July 2022 constituting the largest exploration primate the Agarett, Minscidentarid & Elecater Astrocomposite themselved and the program of the program of the program of the treating themselved to the program of the program of

#### Mineral Resources:

At December 31, 2022, measured and indicated mineral resources totaled 10.6 million ounces of gold and 360.7 million silver. Inferred mineral resources totaled 3.4 million ounces of gold and 96.1 million ounces of silver. Gold equivalent mindicated mineral resources totaled 15.2 million ounces and inferred mineral resources totaled 4.6 million ounces. This estimate included drill assay results received through December 9, 2022. The Company has additional drill assay result pending. See Table 1 below for additional information on mineral resources.

### **Operations Update:**

Processing of gold and silver ore from the leach pads from prior mining operations ceased in December 2022. The Cor

developing a commercial scale milling operation for processing sulfide material, which accounts for the vast majority of mineral resource, along with existing and planned heap leach facilities for processing oxide and leachable transition main-depth study was undertaken to establish the optimal processing method for the sulfide ore. The process yielding the recoveries and hence, best economics for the project, is pressure oxidation (POX) - a proven, conventional technology been utilized at mining operations around the world for decades.

During 2022, the Company continued metallurgical and variability test work necessary for designing a sulfide milling op work will establish: (i) a comprehensive and current understanding of how each geologic domain will perform during op (ii) the processing components and reagents required to optimize gold and silver recoveries. The Company is working leading independent third-party engineering firms to complete this work and expects to receive all test results in April 20 Company will also complete autoclave test work during 2023. These results, and results from the 2022-2023 exploration program, will be used for designing the mine plan, developing the type and size of the mill circuit configuration, and PO equipment, establishing the hauling truck and loading mine fleet, and determining other engineering and facilities required.

Table 1: Hycroft Mineral Resources as of March 27, 2023, Metric Units

	Approximate				Contained Ounces				
Classification	Cutoff, Equiv	/	Gold	Silver	Sulfide	Gold	Silver		
	Gold gm/t	Ktonnes	gm/tonne	gm/tonne	Sulfur%	Ozs x 1000	Ozs x 1000

#### Notes:

- Source: Technical Report Summary dated March 27, 2023
- Mineral Resources are based on metals prices of \$1,900 per ounce of gold and \$24.50 per ounce of silver.
- Cutoffs are income process costs = NPR = NSR-Process OPEX.
- Numbers may not match exactly due to rounding.
- Mineral resources are contained within a computer-generated optimized pit.
- All units are metric. Gold and silver grades are in grams / metric ton.

Mineral resources were developed using block model and pit optimization software to determine the mineralization with reasonable expectation of economic extraction. Table 2 above summarizes the economic parameters used to define the pit that defined the mineral resource. Metal prices for mineral resources were \$1,900/oz gold and \$24.50/oz silver. Eac evaluated to determine which process provides the best net return after operating cost. The two processes are:

- Run of mine heap leaching, or
- Flotation milling followed by POX.

Both process material types are included on the statement of mineral resources (above). Project costs and project recovered well as metal prices can have a substantial impact on the mineral resource both positively and negatively. Mineral resonot mineral reserves and detailed economic considerations have not been applied. Modifying factors for mine and prochave not been applied. Inferred mineral resources have a high degree of uncertainty as to their existence and whether economically or legally mined. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgainly mined.

The scientific and technical information concerning the Hycroft Mine has been reviewed and approved by independent, "Qualified Persons" under the Modernization Rules, including Ausenco Engineering South USA, Inc. ("Ausenco"), Independent Consultants, Inc., ("IMC"), and WestLand Engineering & Environmental Services, Inc. ("WestLand").

About the Hycroft 2022-2023 Exploration Drill Program

The 2022 - 2023 Exploration Drill Program at the Hycroft Mine is a two-phase project comprising approximately 30,000 RC drilling and approximately 7,500 meters of core drilling. Phase 2 drilling is anticipated to begin in the second quarte and includes:

- drilling outside the current plan of operations for which permits are pending; and
- drilling prospective high-grade targets within the plan of operation that were refined based on assay results from drilling.

About Hycroft Mining Holding Corporation

Hycroft is a US-based, gold, and silver company developing the Hycroft Mine located in the world-class mining region of Nevada.

Cautionary Note Regarding Forward-Looking Statements.

Seite 7/8

This news release contains "forward-looking statements" within the meaning of Section 27A of the United States Secur 1933, as amended, Section 21E of the United States Securities Exchange Act of 1934, as amended, or the United States Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, included herein and p statements by our officers or representatives, that address activities, events or developments that our management exp anticipates will or may occur in the future, are forward-looking statements, including but not limited to such things as ful business strategy, plans and goals, competitive strengths and expansion and growth of our business. The words "estim "anticipate", "expect", "intend", "believe" "target", "budget", "may", "can", "will", "would", "could", "should", "seeks", or "s and similar words or expressions, or negatives of these terms or other variations of these terms or comparable language discussion of strategy or intention identify forward-looking statements. Forward-looking statements address activities, e developments that the Company expects or anticipates will or may occur in the future and are based on current expect assumptions. Forward-looking statements include, but are not limited to (i) risks related to changes in our operations at Mine, including risks associated with the cessation of mining operations at the Hycroft Mine; uncertainties concerning e mineral resources; risks related to a lack of a completed feasibility study; and risks related to our ability to re-establish feasible mining operations; (ii) industry related risks including fluctuations in the price of gold and silver; the commercia and risks related to, our exploration and development activities; uncertainties and risks related to our reliance on contra consultants; availability and cost of equipment, supplies, energy, or reagents. The exploration target does not represen should not be construed to be, an estimate of a mineral resource or mineral reserve, as ranges of potential tonnage an quality) of the exploration target are conceptual in nature; there has been insufficient exploration of the relevant propert properties to estimate a mineral resource; and it is uncertain if further exploration will result in the estimation of a miner These risks may include the following and the occurrence of one or more of the events or circumstances alone or in co with other events or circumstances may have a material adverse effect on the Company's business, cash flows, financial and results of operations. Please see our "Risk Factors" set forth in our Annual Report on Form 10-K for the year ende 31, 2022, our Quarterly Report on Form 10-Q for the periods ended September 30, 2022, and other reports filed with the more information about these and other risks. You are cautioned against attributing undue certainty to forward-looking Although we have attempted to identify important factors that could cause actual results to differ materially from those of forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended these forward-looking statements were based on assumptions that the Company believes are reasonable when made, cautioned that forward-looking statements are not guarantees of future performance and that actual results, performance achievements may differ materially from those made in or suggested by the forward-looking statements contained in th release. In addition, even if our results, performance, or achievements are consistent with the forward-looking statement in this news release, those results, performance or achievements may not be indicative of results, performance or achievements subsequent periods. Given these risks and uncertainties, you are cautioned not to place undue reliance on these forwa statements. Any forward-looking statements made in this news release speak only as of the date of those statements. ' undertake no obligation to update those statements or publicly announce the results of any revisions to any of those statements reflect future events or developments.
