Barkerville Rock Sample Results

During August 2022 the Company completed various work programs over its Barkerville properties and results were announced on September 8, 2022 (news release No. 382 - 2022). During the program a total of 23 rock samples were collected and submitted to SGS Labs in Burnaby for assaying. No significant mineralization was detected in these samples except for one sample taken from the 2 Aces East. This sample was anomalous for silver and pathfinder elements arsenic and antimony. Follow-up exploration is warranted on the 2 Aces East and 2 Aces West properties. The Company is considering work programs over the Keithley Creek and contiguous Swift River claims.
