

# Sm Energy Announces Certain Second Quarter 2023 Activity: 2.6 Million Shares Repurchased, Production Up, Capital Expenditures Down, And Entered Agreements To Acquire 22,800 Oily Net Acres

21.06.2023 | [PR Newswire](#)

DENVER, June 21, 2023 - [SM Energy Company](#) (the "Company") announced today certain updates on second quarter 2023 activity.

**Repurchased 2.6 million shares** - The Company continued to repurchase shares under its \$500 million aggregate stock repurchase program, resulting in a total of 2.6 million shares, or 2.2% of shares outstanding (as of March 31, 2023), repurchased during the second quarter. Since inception of the program in September 2022, the Company has repurchased 5.3 million shares. In combination with the Company's \$0.15 per share quarterly dividend, return of capital since inception of the program has amounted to \$221 million, which is an approximate 7% yield to current market capitalization over the 9-month period. The Company currently has approximately 118 million shares outstanding and remaining authorization to repurchase up to \$334 million of its common stock through 2024.

**Positive operations performance** - Second quarter performance to date reflects higher than expected production in South Texas, lower than expected costs as a result of deflation, and earlier than anticipated completion of additional oil handling capacity in South Texas.

- The Company expects to exceed the high end of its second quarter production guidance, driven by Midland Basin asset acquisitions. During the second quarter, the Company acquired 22,800 net acres in its South Texas program.
- The Company expects to underspend the low end of its second quarter guidance for capital expenditures and expects to exceed the high end of its second quarter guidance for production.
- Entered into an agreement for the acquisition of 20,000 net acres located in Dawson and Martin counties, Texas for \$23.5 million, subject to customary conditions and adjustments. The acquisition is expected to close in the third quarter of 2023. The 20,000 net acres include 1,250 Bopd net production that is approximately 2024 oil, plus 1,750 Bopd net production that is approximately 2023 oil, plus 1,750 Bopd net production that is approximately 2022 oil.
- Under development. Based on extensive geologic data and demonstrated economics from nearby wells, the Company expects to redevelop the Dean and Middle Springs areas in the Midland Basin. The Company expects to break even at less than \$50/Bbl oil prices (assuming a 10% discount rate, current market oil price is \$75/Bbl). This transaction is expected to close in the third quarter of 2023.

President and CEO Herb Vogel comments: "We set forth three, strategic objectives for 2023 and our second quarter activities delivered on all of them: increasing the return of capital to our stockholders, elevating operational execution and driving inventory growth. Our operations, land and finance teams are collaborating to drive excellent results and we are on track to achieve our 2023 goals."

**FORWARD-LOOKING STATEMENT** - The Company's revised guidance for 2023 includes: • A 4% increase in production (at 42% oil) from the previous mid-point; • A (\$0.50) reduction in LOE per Boe from the previous mid-point; • A (\$50) million reduction in capital expenditures before acquisitions, which includes the additional starting in October 2023.

This release contains forward-looking statements within the meaning of securities laws. The words "expect," "intend," "plan," "targeting," and similar expressions are intended to identify forward-looking statements. Forward-looking statements in this release include, among other things: revised guidance for second quarter and full year 2023 production, oil as a percentage of total production, LOE and capital expenditures; the expected realization of certain lower costs through the remainder of 2023; the status and expected progress of South Texas oil handling infrastructure; and plans to close an acreage acquisition in Dawson and Martin counties, including the expected breakeven price associated with such acreage. These statements involve known and unknown risks, which may cause SM Energy's actual results to differ materially from results

expressed or implied by the forward-looking statements. Future results may be impacted by the risks discussed in the Risk Factors section of SM Energy's most recent Annual Report on Form 10-K, as such risk factors may be updated from time to time in the Company's other periodic reports filed with the Securities and Exchange Commission. The forward-looking statements contained herein speak as of the date of this release. Although SM Energy may from time to time voluntarily update its prior forward-looking statements, it disclaims any commitment to do so, except as required by securities laws.
