

European Energy Metals Enhances Advisory Board with Trotman

14.09.2023 | [Newsfile](#)

Vancouver, September 14, 2023 - European Energy Metals (TSXV: FIN) (OTC Pink: EUEMF) (FSE: W28) ("European Energy" or the "Company") is pleased to announce the addition of Rick Trotman to its Advisory Board as the Company continues its growth through on-going exploration of its 5,000 square kilometre Lithium-Cesium-Tantalum ("LCT") and Rare Earth Element ("REE") Finnish Pegmatite Project, in central and southern Finland.

Rick Trotman is a professional geologist with a broad range of experience within the mining industry, having worked in both buy-side and sell-side positions as well as technically focused responsibilities with major mining companies such as Barrick Gold, Meridian Gold, and Yamana Gold. Rick is currently the CEO of [Barksdale Resources Corp.](#) and a director at Kenorland Minerals Ltd and Kingfisher Metals Corp. Previously he was with Resource Capital Funds, a leading mining-focused private equity firm, where he was involved in executing a broad range of investments spanning the precious, base and minor metal spaces and was also responsible for establishing and managing the firm's portfolio of exploration investments. He holds a Master of Science in Economic Geology from the University of Nevada Reno and a Bachelor of Science in Geology from Washington State University.

"Rick's varied background is a real asset to European Energy Metals with significant technical experience with both junior and senior mining companies, as well as significant experience from the financing side," commented European Energy Metals CEO Jeremy Poirier.

About the Finland Pegmatite Project

The Finland Pegmatite Project consists of ten exploration concessions in central and Northern Finland and one exploration concession in southern Finland. These reservations cover a total area of over 5,000 square kilometres and are focused on Lithium-Cesium-Tantalum or LCT pegmatite complexes located within the Jarvi-Pohjanmaa and Seinajoki lithium-permissive tracts as defined by the Geological Survey of Finland (GTK). Four of the reservations (Nabba, Lappajarvi West, Lappajarvi East and Kaatiala) lie immediately adjacent to, and to the south of, Keliber Oy's spodumene mine development project in the Kaustinen district.

Keliber Oy is a consortium, comprised of Sibanye-Stillwater (79%), Finnish Minerals Group (20%) and Finnish shareholders (1%). A Definitive Feasibility Study by Hatch dated June 14, 2018 states a JORC Code 2012 compliant Measured and Indicated Mineral Resource of 9.47 million tonnes at a grade of 1.16% Li₂O.²

European Energy cautions investors the presence of lithium mineralization at Keliber Oy is not necessarily indicative of similar mineralization at the Nabba concession.

About European [Energy Metals Corp.](#)

[European Energy Metals Corp.](#) is a junior mining company currently focussed on the Lithium-Cesium-Tantalum Finnish Pegmatite Project in central Finland. Governing bodies in Europe and Finland are legislating environmentally friendly and energy independent laws and policies. One of the key components is access to REE and, specifically, lithium. The company's concessions are located within 11 miles of the Keliber under construction which is expected to begin production in H2 2025.

Cautionary Statements Regarding Forward Looking Information

This news release contains forward-looking information within the meaning of applicable securities legislation. Forward-looking information is typically identified by words such as: believe, expect, anticipate, intend, estimate, postulate and similar expressions, or are those, which, by their nature, refer to future events. Such statements include, without limitation, statements regarding the future results of operations, performance and achievements of the Company, including the presence of lithium mineralization at, and the exploration and development potential of, the Finland Pegmatite Project. Although the Company believes that such statements are reasonable, it can give no assurances that such expectations will prove to be correct. All such forward-looking information is based on certain assumptions and analyses made by the Company in light of their experience and perception of historical trends, current conditions and expected future developments, as well as other factors management believes are appropriate in the circumstances. This information, however, is subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking information. Important factors that could cause actual results to differ from this forward-looking information include the costs of any anticipated work programs and the ability to fund such costs, required approvals in connection with any work programs and the ability to obtain such approvals, risks inherent in exploration as well as those described under the heading "Risks and Uncertainties" in the Company's most recently filed MD&A. The Company does not intend, and expressly disclaims any obligation to, update or revise the forward-looking information contained in this news release, except as required by law. Readers are cautioned not to place undue reliance on forward-looking information.
