

# California Resources Corporation Expecting Strong Fourth Quarter 2023 Results; Schedules Fourth Quarter and Full Year 2023 Earnings Conference Call

04.01.2024 | [Business Wire](#)

[California Resources Corp.](#) (NYSE: CRC) updated select guidance ranges for the fourth quarter of 2023 in conjunction with its participation in various investor conferences later this month.

- CRC's fourth quarter of 2023 free cash flow<sup>1</sup> is expected to range between \$40 to \$60 million primarily due to higher margins earned from natural gas marketing activities and lower investments in carbon capture and storage (CCS) related subsurface land easements. This free cash flow<sup>1</sup> update exceeds the previously announced fourth quarter 2023 guidance range of (\$5) to \$30 million.
- Total net production for the fourth quarter of 2023 is expected to range between 82 - 84 thousand barrels of oil equivalent per day (MBoe/d), which falls in line with previously issued guidance. Approximately 60% of total net production for this period is expected to be oil.
- Capital investments for the fourth quarter of 2023 are expected to be in the \$65 to \$75 million range from the previously announced guidance range of \$65 to \$81 million. Reduced capital spend in the fourth quarter of 2023 was primarily related to timing of key projects and continued efficiency gains.
