"HMH delivered record high earnings in the fourth quarter, driven by a continued steady increase in aftermarket activity. We remain optimistic about the future, and believe the company continues to be uniquely positioned for further growth. We are pleased to see that the company completed its refinancing, a key enabler for a potential future liquidity event for HMH. Offshore also delivered solid results in the fourth quarter and the market for this type of anchor handlers remains strong in terms of charter rates and with regards to asset values."

Order intake within this segment was up 8% year-on-year and up 1% quarter-on-quarter driven by Contractual Services Agreement orders, partly offset by lower spares and SPS activity.

Revenues from Projects, Products & Other were USD 51 million in the quarter, down 7% year-on-year and down 8% quarter-on-quarter driven by progress on projects.

## AKOFS Offshore

AKOFS Offshore reported revenues of USD 37 million and EBITDA of USD 13 million in the quarter.

Utilization for both Skandi Atlantic and Skandi Emerald was 100 percent in the quarter. Skandi Atlantic was on contract with Petrofac through the period. The contract was further extended in the first quarter 2024, with Skandi Emerald to replace Skandi Atlantic in March 2024 as Skandi Atlantic will undergo its class renewal in Singapore. Skandi Emerald was on contract with Beach Energy through the fourth quarter, until she demobilized early January this year. The vessel will be working in the spot market out of Singapore until she will mobilize for the Petrofac contract in March. Skandi Peregrino remained in lay-up until she went to yard in Denmark in December 2023 to undergo its Special Periodic Survey. The vessel is expected to be ready for market by end of the first quarter of 2024.
