Transaction Highlights

- **Potential Near-Term Gold Production:** Based on a prefeasibility study¹ conducted in February 2023 by TML, the Goliath Gold Complex Project (the "GGC Project") is poised for production with a forecasted 13-year mine life. It anticipates producing 109,000 ounces of gold annually at a cash cost¹ of US\$892 per ounce and an all-in sustaining cost (AISC)² of US\$1,037 per ounce during the first nine years. The prefeasibility study projected a net present value (NPV) of \$493 million at a 5% discount rate, and an internal rate of return (IRR) of 33.5% based on a gold price of US\$1,950 per ounce. The project benefits from readily available world class infrastructure and has secured a Federal Environmental Assessment approval. The final feasibility study and permitting processes are currently underway.
- **Strong Financial Position:** The balance sheet will be fortified with a combined cash position of more than C\$10 million, plus a proposed concurrent flow-through financing for aggregate gross proceeds of up to approximately \$6.4 million to be completed by TML prior to the completion of the Arrangement.
- **Enhance Capital Markets Focus:** New capital markets strategy to be led by cornerstone investor Frank Giustra complements significant expertise in mine permitting, construction, operations, and exploration to create value for shareholders.
- **Renewed Exploration Commitment:** Exploration efforts are expected to be intensified with the Dryden, Ontario district, focusing on expanding the current mineral resource area. An experienced team will oversee these efforts, aiming to simultaneously advance development and exploration, maximizing dual-track value realization.

- **Growth and Consolidation Strategy:** The companies are actively pursuing a proactive strategy to assess and undertake strategic acquisitions, aiming to accelerate growth and strengthen its industry position.
- **Strong Proven Management Team:** The combined company's management team will draw on the proven track record of both companies, with a combined skill set of mining development, operations, finance, exploration and community relations experience.
