About Canada One

Canada One is a premier resource exploration company operating in Canada. From exploration to discovery to resource development, the Company is focused on creating growth and generating value for its investors and communities as it meets the growing global demand for critical metals. Copper Dome is the Company's flagship project with its northern border situated 1.5kms from Hudbay Mineral's Copper Mountain Mine deposits.

About the Copper Dome Project

The Project lies within the lower portion of the Quesnel Trough porphyry belt, a well-established mining district. The belt extends north from the Copper Mountain Mine, through the Elk, Brenda, Craigmont, Highland Valley, and New Afton mines. Previous drilling on the property has confirmed the presence of high-grade copper associated with northeast running geological structures similar to those seen at the Copper Mountain Mine:

- Past exploration has identified the presence of palladium (Pd), platinum (Pt) and gold (Au) mineralization on the Property
- Multiple zones of mineralization have been discovered on the Property to date
- Excellent infrastructure provides year-round access with low-cost exploration and low jurisdictional risk
- Past exploration includes, airborne magnetics flown over the entire Project, 51km of induced polarization (IP) surveyed over areas of interest, Airborne Magnetics and electro-magnetics (EM) surveyed over half of the Project area, 2,253 soil and 378 rock samples collected, over 8900m of diamond drilling and over 1km of trenching

The Company also announces it has terminated the Abitibi East and Nellie option agreement, first announced October 18, 2023. There are no outstanding liabilities or obligations associated with the termination.
