

Great Atlantic Resources Corp Completes Sixth Hole of 2024 Diamond Drilling Program

11.10.2024 | [Newsfile](#)

Intersecting Gold Bearing Vein at the Jaclyn Main Zone at its 100% Owned Golden Promise Gold Property

Vancouver, October 11, 2024 - [Great Atlantic Resources Corp.](#) (TSXV: GR) (the "Company" or "Great Atlantic") is pleased to announce its wholly owned subsidiary, Golden Promise Mines Inc., has completed the sixth hole of the 2024 diamond drilling program at its Golden Promise Gold Property, located in central Newfoundland.

A quartz vein with visible gold (VG) was intersected in the sixth hole (GP-24-162). The fully funded drill program is being conducted in the west region of the gold-bearing Jaclyn Main Zone (JMZ) in the area of a planned bulk sample.

Drill hole GP-24-162 was completed on the same northwest-southeast section as the first five holes of the program (GP-24-157 to GP-24-161), testing under the first five holes, testing for the extension of the main quartz vein(s) slightly deeper.

Drill hole GP-24-162 was collared 13 meters slightly southeast of the collars of drill holes GP-24-160 and GP-24-161 and was drilled slightly northwest (approximately 347 degrees) at a dip of approximately 60 degrees and to a length of 149.5 meters.

A quartz vein with visible gold was intersected in hole GP-24-162 at 108.10 - 109.69 meters (1.59 meters core length).

The 2024 drilling program is being conducted within the west region of the JMZ targeting gold bearing quartz veins to approximately 100 meters vertical depth. Eleven holes are planned. The first six holes (GP-24-157 to GP-24-162) were drilled on the same northwest - southeast section to intersect the steeply dipping, east to slightly northeast trending JMZ. These holes were all drilled slightly northwest (approximately 344 - 347

degrees) at dips between 46 and 61 degrees. Previously completed drill holes GP-157, GP-158, GP-24-160 and GP-24-161 each intersected quartz veins with visible gold (see Company News Releases of September 24th and October 2nd, 2024). The first six holes totalled 580 meters. Drill core samples from the 2024 program have / will be submitted for gold and multi-element analysis.

The 2024 drilling program is being conducted with partner Novamera Inc. and will include Novamera's proprietary Guidance Technology, providing increased data and resource knowledge to define the shape, geometry and continuity of the vein. The drilling is being conducted in the area of a planned bulk sample, which is also fully funded.

The 2024 diamond drilling and subsequent planned bulk sample work at the JMZ is being funded in part by co-investment from DIGITAL, Canada's Global Innovation Cluster for digital technologies, as part of a larger project that aims to support data-driven and digital solutions within the mining sector. The Link to the announcement can be found [here](#).

The planned approximately 2700 tonne bulk sample at the JMZ is to be extracted after diamond drilling and bulk sampling approval using a precision mining method, powered by Novamera's proprietary Surgical Mining technologies. The transformative new mining method leverages hardware, software, AI and ML paired with conventional drilling equipment to extract ore at a fraction of the cost of conventional mining methods.

Great Atlantic reported a National Instrument 43-101 compliant inferred resource estimate during late 2018 for the JMZ of 357,500 tonnes at 10.4 g/t gold (119,900 ounces of gold - uncapped) (see Company News Release of December 6, 2018; and Sedar-filed National Instrument 43-101 Technical Report on the Golden Promise Property, Central Newfoundland (revised), dated December 4, 2018 by Mr. Greg Z. Mosher, M.Sc. App., P.Geo., and Mr. Larry Pilgrim, B.Sc., P.Geo.).

The Golden Promise Gold Property is the largest and most advanced of eight central Newfoundland gold properties owned by Golden Promise Mines Inc. and located within the Exploits Subzone of the Newfoundland Dunnage Zone. One of these properties (Golden Trust) is located within one kilometer of the Valentine Gold Mine of [Calibre Mining Corp.](#) (TSX: CXB) (OTCQX: CXBMF) which is also located within the Exploits Subzone.

About Great Atlantic Resources Corp.: Great Atlantic Resources Corp. is a Canadian exploration company focused on the discovery and development of mineral assets in the resource-rich and sovereign risk-free realm of Atlantic Canada, one of the number one mining regions of the world. Great Atlantic is currently surging forward building the company utilizing a Project Generation model, with a special focus on the most critical elements on the planet that are prominent in Atlantic Canada, Gold, Copper, Zinc, Nickel, Cobalt, Antimony and Tungsten.

This press release includes certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical facts, that address future exploration drilling, exploration activities and events or developments that the Company expects, are forward looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include exploitation and exploration successes, continued availability of financing, and general economic, market or business conditions.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
