

ADM Wins Business Intelligence Group's 2025 Innovation Award for Regenerative Agriculture Program

31.01.2025 | [Business Wire](#)

[ADM](#) (NYSE: ADM), a global leader in innovative solutions from nature, was recently recognized as a winner of the 2025 BIG Innovation Awards, presented by the Business Intelligence Group. This recognition highlights ADM's leadership in driving transformative change through its cutting-edge regenerative agriculture program.

The 2025 BIG Innovation Awards celebrate organizations and individuals pushing boundaries and advancing their industries. Winners are evaluated by a panel of seasoned business leaders and executives who consider creativity, measurable results, and overall impact in their selections.

ADM's regenerative agriculture program was central to this recognition. By integrating advanced technologies, collaborative partnerships, and sustainable farming practices, the program has supported the transition to a more resilient global food system. These efforts contribute to reducing greenhouse gas emissions and improving soil health, delivering measurable benefits for both farmers and the environment.

"Being recognized by the BIG Innovation Awards underscores the critical role of innovation in addressing supply chain resiliency and global sustainability challenges," said Greg Morris, president of ADM's Ag Services and Oilseeds business. "Our focus has been on working collaboratively with farmers and partners to develop practical solutions that support long-term environmental health and food security. Innovation is key to making these efforts scalable and impactful, and we are committed to continuing this work."

"Humanity relies on innovation to improve our lives and the planet," said Russ Fordyce, CEO of the Business Intelligence Group. "We're thrilled to spotlight ADM as a shining example of innovation making a profound impact globally."
