Alvopetro Energy Ltd. is deploying a balanced capital allocation model where we seek to reinvest roughly half our cash in organic growth opportunities and return the other half to stakeholders. Alvopetro's organic growth strategy is to focus on combinations of geologic prospectivity and fiscal regime. Alvopetro is balancing capital investment opportunities in Canada and Brazil where we are building off the strength of our Caburé and Murucututu natural gas fields and the related strategic infrastructure.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this news release.

All amounts contained in this new release are in United States dollars, unless otherwise stated and all tabular amounts

thousands of United States dollars, except as otherwise noted.

Abbreviations:

boepd = barrels of oil equivalent ("boe") per day

bopd = barrels of oil and/or natural gas liquids (condensate) per day

Mcf = thousand cubic feet

Mcfpd = thousand cubic feet per day

MMcfpd = million cubic feet per day

NGLs = natural gas liquids

Q1 2025 = three months ended March 31, 2025

Q4 2024 = three months ended December 31, 2024

BOE Disclosure. The term barrels of oil equivalent ("boe") may be misleading, particularly if used in isolation. A boe conversion ratio of six thousand cubic feet per barrel (6Mcf/bbl) of natural gas to barrels of oil equivalence is based on an energy equivalent conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. All conversions in this news release are derived from converting gas to oil in the ratio mix of six thousand cubic feet of gas to one barrel of oil.
