Mayfair's Chief Executive Officer Nicholas Campbell commented,

"Dear Stakeholders,

I am pleased to provide an update on our progress at Mayfair Gold and the Fenn-Gib Gold project in Northern Ontario. In the current elevated gold price environment, we believe that the Fenn-Gib gold project is one of the few open pit gold development projects in Canada that can be uniquely advanced through an Ontario Provincial permitting process, with potential to be developed into a new gold mine during the current elevated gold price environment. We continue to advance the Fenn-Gib gold project through ongoing programs on metallurgy, engineering, mine planning and environmental baseline data collection and review to support the commencement of the Ontario permitting process and the completion of a pre-feasibility study on a 4,800 tonne per day operation targeting the near surface high-grade mineralization at the Project. This should be an exciting year for Mayfair and its Stakeholders. We look forward to sharing our progress in 2025. "
