PARTICIPANT DIAL IN (TOLL FREE): 1-833-752-3576

PARTICIPANT INTERNATIONAL DIAL IN: 1-647-846-8340

About Cerrado

Cerrado Gold is a Toronto-based gold production, development, and exploration company. The Company is the 100% owner of the producing Minera Don Nicolás and Las Calandrias mine in Santa Cruz province, Argentina. In Portugal, the Company holds an 80% interest in the highly prospective Lagoa Salgada VMS project through its position in Redcorp - Empreendimentos Mineiros, Lda. In Canada, Cerrado Gold is developing its 100% owned Mont Sorcier Iron project located outside of Chibougamou, Quebec.

In Argentina, Cerrado is maximizing asset value at its Minera Don Nicolas operation through continued operational optimization and is growing production through its operations at the Las Calandrias heap leach project. An extensive campaign of exploration is ongoing to further unlock potential resources in our highly prospective land package in the heart of the Deseado Massif.

In Portugal, Cerrado focused on the exploration and development of the highly prospective Lagoa Salgada VMS project located on the prolific Iberian Pyrite Belt in Portugal. The Lagoa Salgada project is a high-grade polymetallic project, demonstrating a typical mineralization endowment of zinc, copper, lead, tin, silver, and

gold. Extensive exploration upside potential lies both near deposit and at prospective step-out targets across the large 7,209-hectare property concession. Located just 80km from Lisbon and surrounded by exceptional infrastructure, Lagoa Salgada offers a low-cost entry to a significant exploration and development opportunity, already showing its mineable scale and cashflow generation potential.

In Canada, Cerrado holds a 100% interest in the Mont Sorcier Iron project, which has the potential to produce a premium iron ore concentrate over a long mine life at low operating costs and low capital intensity. Furthermore, its high grade and high purity product facilitates the migration of steel producers from blast furnaces to electric arc furnaces, contributing to the decarbonization of the industry and the achievement of sustainable development goals.
