

Integral Metals Announces Start of High-Resolution Soil Sampling Program at the KAP Project

29.05.2025 | [GlobeNewswire](#)

CALGARY, May 29, 2025 - [Integral Metals Corp.](#) (CSE: INTG | OTC: ITGLF | FSE: ZK9) (the "Company" or "Integral") is pleased to announce that the Phase 2 soil sampling program has officially commenced at the Company's 100%-owned KAP Project, located in the Northwest Territories. This program builds upon the previously announced plans for expanded geochemical work (see news release dated May 14, 2025), with field crews now active on site and systematically collecting soil samples over the finalized grid.

The Phase 2 exploration program will include approximately 2,100 soil samples collected on a 30-meter by 30-meter grid, with tighter sample spacing than previously proposed. This increased resolution is designed to improve the definition of geochemical anomalies surrounding the Main Zone, the primary showing on the property and a key focus of current exploration efforts.

"Our objective with this program is to refine and delineate the geochemical footprint of the Main Zone," said Paul Sparkes, CEO of Integral Metals. "With this tighter sampling grid, we expect to see enhanced contrast in any pathfinder or target element anomalies, which will directly inform drill targeting and structural interpretations later this season."

Figure 1 presents the final grid layout, has been designed to cover the area surrounding the Main Zone, incorporating both historical soil anomalies and recently identified gravity features. Sample collection is expected to be completed within two weeks, weather permitting.

Figure 1 - Finalized sampling plan at the Main Showing on the KAP property.

The Phase 2 program follows a successful Phase 1 field season, which included retrieving historical drill core, spotting historical drill collars, reconnaissance rock sampling, and reprocessing historical gravity survey data. Those results provided the foundation for this focused follow-up effort. The KAP Project is prospective for MVT-style lead-zinc mineralization enriched with gallium and germanium, hosted beneath shallow overburden, and represents one of the Company's core exploration priorities for 2025.

ABOUT INTEGRAL METALS CORP.

Integral is an exploration stage company, engaged in the business of mineral exploration for critical minerals, including gallium, germanium, and rare earth elements, with the goal of contributing to the development of a domestic supply chain for these minerals. Integral holds properties in mining-friendly jurisdictions in Canada and the United States of America, including the Northwest Territories, Manitoba and Montana, where it has received regulatory support for its exploration efforts.

Forward-Looking Information

Certain statements contained in this press release constitute forward-looking information. These statements relate to future events or future performance. The use of any of the words "could", "intend", "expect", "believe", "will", "projected", "estimated" and similar expressions and statements relating to matters that are not historical facts are intended to identify forward-looking information and are based on the Company's current beliefs or assumptions as to the outcome and timing of such future events. In particular, this press release contains forward-looking information relating to, among other things, the Company's future plans and prospects.

Various assumptions or factors are typically applied in drawing conclusions or making the forecasts or projections set out in forward-looking information, including, in respect of the forward-looking information included in this press release, assumptions regarding the future plans and strategies of the Company.

Although forward-looking information is based on the reasonable assumptions of the Company's management, there can be no assurance that any forward-looking information will prove to be accurate. Forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Such factors include, among other things, the risk that the Company's business prospects and priorities may change, whether as a result of unexpected events, general market and economic conditions or as a result of the Company's future exploration efforts, and that any such change may result in a re-deployment of the Company's resources and efforts in a manner divergent from the Company's current business plan or strategy. The forward-looking information contained in this release is made as of the date hereof, and the Company is not obligated to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by applicable securities laws. Because of the risks, uncertainties and assumptions contained herein, investors should not place undue reliance on forward-looking information. The foregoing statements expressly qualify any forward-looking information contained herein.
