

Scorpio Gold Leach Pad Activated for Gold Recovery at Mineral Ridge

01.03.2011 | [Marketwired](#)

VANCOUVER, BRITISH COLUMBIA -- (Marketwire - March 1, 2011) - [Scorpio Gold Corporation](#) (the "Company") (TSX VENTURE: SGN - News) reports that the application of solution to the leach pad for gold recovery at its 70% owned, fully funded, fully permitted Mineral Ridge Gold Project in Nevada has commenced.

Scheduling remains on track to commence processing of pregnant solution through the ARD plant to initially produce gold later this month.

Crushing, agglomeration and stacking of gold-bearing material mined by previous owners continues, and the application of leaching solution will increase as the various cell pads are configured. There are presently some 280,000 tons of the previously mined material available to be treated on the pad, after which, material for the balance of 2011 will be mined from the Drinkwater Pit.

Gold production, which is completely un-hedged, is expected to reach a steady state by June and then continue to track positively in the second half of 2011.

The Company's interest in the Mineral Ridge project is expected to increase to 80% before year end based on Mineral Ridge achieving two quarters of commercial production, pursuant to its agreement with Golden Phoenix Minerals.

Peter J. Hawley, PGeo, President and CEO, is the Company's Qualified Person for the Mineral Ridge project and has reviewed the content of this release.

For additional information please see the Company's website at www.scorpiongold.com.

ON BEHALF OF THE BOARD SCORPIO GOLD CORPORATION

Peter J. Hawley
President & CEO

The Company relies on litigation protection for "forward-looking" statements. This news release contains forward-looking statements that are based on the Company's current expectations and estimates. Forward-looking statements are frequently characterized by words such as "plan", "expect", "project", "intend", "believe", "anticipate", "estimate", "suggest", "indicate" and other similar words or statements that certain events or conditions "may" or "will" occur, and include, without limitation, statements regarding the Company's plans with respect to the development and commencement of production at its Mineral Ridge property. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause actual events or results to differ materially from estimated or anticipated events or results implied or expressed in such forward-looking statements. Factors that may cause actual results to vary materially include, but are not limited to, changes in general economic conditions or conditions in the financial markets, fluctuations in gold prices and currency exchange rates and unanticipated operational or technical difficulties. Such forward looking information is based on a number of assumptions, including but not limited to, the continuing availability of financing, no significant decline in existing general business and economic conditions, the level and volatility of the gold price, the accuracy of our resource estimates and of the geological, metallurgical, price and other assumptions on which the estimates are based. Any forward-looking statement speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise. Forward-looking statements are not guarantees of future performance and accordingly undue reliance should not be put on such statements due to the inherent uncertainty therein.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
