---

*Note: AuEQ(Au Equivalent)calculated using US\$800 / oz for Au and \$2.00 per lb for Cu:AuEQ=Au+(Cu\*22.05\*2.00/800\*31.1035)*

The above drill intercepts are approximately 90% true widths. The above stated AuEq are head grades and do not include metallurgical recovery rates or net smelter returns. Assaying for the above drill core was completed by AGAT of Mississauga, Ontario.

A further 7 holes are pending for the current 2010 drill program of which 6 are from the Maybrun Main zone and one deep hole of about 650m in core length is pending from the Footwall Zone.

In addition, approximately 700 further drill core samples, averaging about 1m each, are pending from the Footwall Zone from about 22 holes between 2006 to 2010. The Footwall Zone is contiguous to and underlies the Maybrun Main Zone.

Mr. Robert Laakso, P.Eng. is the Qualified Person for the Atikwa Lake project and he has reviewed the contents of this release.
