Labrador Iron Mines Holdings Limited (LIM)

LIM's Schefferville Area projects involve the development of twenty direct shipping iron ore deposits in western Labrador and north-eastern Quebec near Schefferville, Quebec. The Company's properties are part of the historic Schefferville area iron ore district where mining of adjacent deposits was previously carried out by the Iron Ore Company of Canada from 1954 to 1982.

LIM contemplates developing its Schefferville Area projects in stages. The first phase of Stage 1 comprises the James Deposit where mining has already commenced. Approximately 500,000 tonnes of material has now been moved from the James North and James South mines. About 100,000 tonnes of ore has been mined up to April 22, 2011 and a stockpile of over 50,000 tonnes of iron ore has been built up ahead of the crusher. Construction of the Silver Yards processing plant has been completed and it is expected that, following commissioning, the first ore will be fed to the plant in May.
